ENERGY POLICY

Index to Volume 33

January, February, March, April, May, June, July, August, September, October, November, December

Articles—Titles

Alternative energy

Diesel vs. compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722

Electricity generation: regulatory mechanisms to incentive renewable alternative energy sources in Brazil *C K N Cavaliero and E P Da Silva* 33:13, 1745–1752

Micro-economic modelling of biofuel system in France to determine tax exemption policy under uncertainty *S Rozakis, J C Sourie* 33:2, 171–182

Natural gas as an alternative to crude oil in automotive fuel chains well-to-wheel analysis and transition strategy development *A P C Faaij, M P Hekkert, F H J F Hendriks and M L Neelis* 33:5, 579–594

Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142

Carbon trading

Abatement costs of post-Kyoto climate regimes *M den Alzen, P Lucas and D van Vuuren* 33:16, 2138–2151

Energy-related taxation as an environmental policy tool—the Finnish experience 1990–2003 *L Vehmas* 33:17, 2175–2182

Impacts of a common green certificate market on electricity and CO_2-emission markets in the Nordic countries *E O Ahlgren and T Unger* 33:16, 2152–2163

The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022

Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576

Optimising trans-national power generation and transmission investments: a Southern African example *B Gonah, B Graeber and R Spalding-Fecher* 33:18, 2337–2349

Transaction costs, institutional rigidities and the size of the clean development mechanism *F Jotzo and A Michaelowa* 33:4, 511–523

The welfare effects and the distributive impact of carbon taxation on Italian households *S Tiezzi* 33:12, 1597–1612

Climate change

Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756

Climate-related electricity demand-side management in oil-exporting countries—the case of the United Arab Emirates *M A Al-Iriani* 33:18, 2350–2360

Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722

The impact of global change on the hydropower potential of Europe: a model-based analysis *G Czisch, B Lehner and S Vassolo* 33:7, 839–855

The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022

International markets for greenhouse gas emission reduction policies—possibilities for integrating developing countries *K Halsnæs and A Olhoff* 33:18, 2313–2325

Managing a reservoir-based hydro-energy plant: building understanding in the buy and sell decisions in a changing environment *P Davidsen, M Rudd and A van Ackere* 33:7, 939–947

The marginal damage costs of carbon dioxide emissions: an assessment of the uncertainties *R S J Tol* 33:16, 2064–2074

Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576

Coal

Coal cleaning: a viable strategy for reduced carbon emissions and improved environment in China? *S Glomsrod and W Taoyuan* 33:4, 525–542

The costs of mitigating carbon emissions in China: findings from China MARKAL-MACRO modeling *W Chen* 33:7, 885–896

Defining geographic coal markets using price data and shipments data *L Wårell* 33:17, 2216–2230

Driving forces behind the stagnancy of China's energy-related CO_2 emissions from 1996 to 1999: the relative importance of structural change, intensity change and scale change *S Kaneko, S Matsuoka and L Wu* 33:3, 319–335

Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270

Evaluating the impact of three incentive programs on the economics of cofiring willow biomass with coal in New York State *L P Abrahamson, C A Lindsey, P J Tharakan, T A Volk and E H White* 33:3, 337–347

External costs of electricity production: case study Croatia *N Debrecin, Z Tomsic and M B Vrhovcak* 33:11, 1385–1395

Improving air quality in large cities by substituting natural gas for coal in China: changing idea and incentive policy implications *Y Chang, X Guo, X Mao and Y Peng* 33:3, 307–318

Probabilistic analysis of electrical energy costs comparing: production costs for gas, coal and nuclear power plants *D Feretic and Z Tomsic* 33:1, 5–13

The rise and fall of German hard coal subsidies *K Storchmann* 33:11, 1469–1492

US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108

Cogeneration

Cogeneration: a regulatory framework toward growth *E Cardona and A Piacentino* 33:16, 2100–2111

Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798

Economic and environmental efficiency of district heating plants *P J Agrell and P Bogetoft* 33:10, 1351–1362

Efficiency gains in Danish district heating. Is there anything to learn from benchmarking? *P Fristrup, J Munksgaards and L-L Pade* 33:15, 1986–1997

Evaluating the impact of three incentive programs on the economics of cofiring willow biomass with coal in New York State *L P Abrahamson, C A Lindsey, P J Tharakan, T A Volk and E H White* 33:3, 337–347

Market value for thermal energy of cogeneration: using shadow price estimation applied to cogeneration systems in Korea *D W An, O S Kwon and W-C Yun* 33:14, 1789–1795

Second stage energy conservation experience with a textile industry *N S Babu and C Palanichamy* 33:5, 603–609

UK innovation systems for new and renewable energy technologies: drivers, barriers and systems failures *D Anderson, A Arnall, A Chase, T J Foxon, R Gross and J Howes* 33:16, 2123–2137

Cost–benefit analysis

Assessing policies towards sustainable transport in Europe: an integrated model *T Zachariadis* 33:12, 1509–1525

Business opportunities and dynamic competition through distributed generation in primary electricity distribution networks *R Raineri, S Rios and R Vásquez* 33:17, 2191–2201

Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010
Decision support tool to evaluate alternative policies regulating wind integration into autonomous energy systems *G C Contaxis, J Kabouris and N Zouros* 33:12, 1541–1555
Design for renewable energy systems with application to rural areas in Japan *K Kubo, A Lamont and T Nakata* 33:2, 209–219
Determination of the optimal installation capacity of small hydro-power plants through the use of technical, economic and reliability indices *F Forouzbakhsh, S M H Hosseini and M Rahimpoor* 33:15, 1948–1956
Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722
Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798
Economic, energy, and the environmental impact of the Louisiana Energy Fund *M J Kaiser, W O Olatubi and A G Pulsipher* 33:7, 873–883
Economic and environmental efficiency of district heating plants *P J Agrell and P Bogetoft* 33:10, 1351–1362
Economic and policy implications of public support for ethanol production in California's San Joaquin Valley *E Burnes, J W Hagen and D Wichelns* 33:9, 1155–1167
Feebates, rebates and gas-guzzler taxes: a study of incentives for increased fuel economy *D L Greene, J Li, P D Patterson and M Singh* 33:6, 757–775
Global experience curves for wind farms *A Faaij, M Junginger and W C Turkenburg* 33:2, 133–150
Health costs caused by oil extraction air emissions and the benefits from abatement: the case of Kazakhstan *W heijman, I Netalieva and J Wesseler* 33:9, 1169–1177
Improving air quality in large cities by substituting natural gas for coal in China: changing idea and incentive policy implications *Y Chang, X Guo, X Mao and Y Peng* 33:3, 307–318
Inclusion of cool roofs in nonresidential Title 24 prescriptive requirements *H Akbari, S Bretz, S Konoopacki and R Levinson* 33:2, 151–170
International markets for greenhouse gas emission reduction policies—possibilities for integrating developing countries *K Halsnæs and A Olhoff* 33:18, 2313–2325
Move over! Stock turnover, retrofit and industrial energy efficiency *G Biermans and E Worrell* 33:7, 949–962
Paradise recovered: energy production and waste management in island environments *B Hale and M L Miranda* 33:13, 1691–1702
The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312
Probabilistic analysis of electrical energy costs comparing: production costs for gas, coal and nuclear power plants *D Feretic and Z Tomsic* 33:1, 5–13
Renewable energy as a natural gas price hedge: the case of wind *D Berry* 33:6, 799–807
The road to green power in Mexico—reflections on the prospects for the large-scale and sustainable implementation of renewable energy *J M Huacuz* 33:16, 2087–2099
Solar supported steam production for power generation in Egypt *M A H El-Sayed* 33:10, 1251–1259
Techno-economic evaluation of small hydro power plants in Greece: a complete sensitivity analysis *J K Kaldellis, G Korbakis and D S Vlachou* 33:15, 1969–1985
Transaction costs, institutional rigidities and the size of the clean development mechanism *F Jotzo and A Michaelowa* 33:4, 511–523
Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298
Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Electricity

Accelerating residential PV expansion: demand analysis for competitive electricity markets *R Duke, A Payne and R Williams* 33:15, 1912–1929
Are new institutional economics enough? Promoting photovoltaics in India's agricultural sector *V Radulovic* 33:14, 1883–1899
Assessing of energy policies based on Turkish agriculture: current status and some implications *C Sayin, M N Mencet and B Ozkan* 33:18, 2361–2373
Availability of kerosene to rural households: a case study from India *P Malhotra, R C Pal, I H Rehman and P B Singh* 33:17, 2165–2174
Benchmarking and incentive regulation of quality of service: an application to the UK electricity distribution networks *D Giannakis, T Jamash and M Pollitt* 33:17, 2256–2271
Business opportunities and dynamic competition through distributed generation in primary electricity distribution networks *R Raineri, S Ríos and R Vásquez* 33:17, 2191–2201
Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756
Calculating residential carbon dioxide emissions—a new approach *K Bohan, J Good, L Hughes and K Jafapur* 33:14, 1865–1871
Carbon emission coefficient of power consumption in India: baseline determination from the demand side *B Nag and J K Parikh* 33:6, 777–786
Carbon intensity of electricity generation and CDM baseline: case studies of three Chinese provinces *T C Heller, M M May and C Zhang* 33:4, 451–465
Climate-related electricity demand-side management in oil-exporting countries—the case of the United Arab Emirates *M A Al-Iriani* 33:18, 2350–2360
Cogeneration: a regulatory framework toward growth *E Cardona and A Piacentino* 33:16, 2100–2111
Cost functions and the electric utility industry. A contribution to the debate on deregulation *F J Ramos-Real* 33:1, 69–87
The costs of mitigating carbon emissions in China: findings from China MARKAL-MACRO modeling *W Chen* 33:7, 885–896
Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010
Decision support tool to evaluate alternative policies regulating wind integration into autonomous energy systems *G C Contaxis, J Kabouris and N Zouros* 33:12, 1541–1555
Design for renewable energy systems with application to rural areas in Japan *K Kubo, A Lamont and T Nakata* 33:2, 209–219
Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798
Double-dividend analysis with SCREEN: an empirical study for Switzerland *C W Frei, P A Haldi and G Sarlos* 33:5, 633–650
The early adoption of green power by Dutch households An empirical exploration of factors influencing the early adoption of green electricity for domestic purposes *K Arkesteijn and L Oerlemans* 33:2, 183–196
Economic and environmental efficiency of district heating plants *P J Agrell and P Bogetoft* 33:10, 1351–1362
Efficiency gains in Danish district heating. Is there anything to learn from benchmarking? *P Fristrup, J Munksgaards and L-L Pade* 33:15, 1986–1997
Electricity consumption, employment and real income in Australia: evidence from multivariate Granger causality tests *P K Narayan and R Smyth* 33:9, 1109–1116
Electricity consumption and economic growth: evidence from Korea *S-H Yoo* 33:12, 1627–1632
Electricity generation: regulatory mechanisms to incentive renewable alternative energy sources in Brazil *C K N Cavaliero and E P Da Silva* 33:13, 1745–1752
Electricity market modeling trends *A Baillo, A Ramos, M Rivier and M Ventosa* 33:7, 897–913
Electricity restructuring in Turkey *Ö Özkývrak* 33:10, 1339–1350
Electricity sector restructuring in India: an environmentally beneficial policy? *R Perkins* 33:4, 439–449
Electricity tariffs in Hong Kong: what went wrong and what can we do about it? *S Luk* 33:8, 1085–1093
Electric power oligopoly and suspicious minds—a critique of a recently approved merger *M Nilsson* 33:15, 2023–2036
Electrification co-operatives bring new light to rural Tanzania *W Chambala, M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1299–1307
Empirical observations of bidding patterns in Australia's National Electricity Market *D Batten, G Grozev and X Hu* 33:16, 2075–2086
Energy and energy utilization in agricultural sector of Saudi Arabia *I Al-Zaharnah, I Dincer and M M Hussain* 33:11, 1461–1467
Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689
Energy demand and environmental taxes: the case of Greece *M L Polemis, V T Rapanos* 33:14, 1781–1788
Energy efficiency—a forgotten goal in the Swedish building sector? *J Holmberg and J Nässén* 33:8, 1037–1051

Energy efficiency improvement procedures and audit results of electrical, thermal and solar applications in Palestine *I H Ibrik and M M Mahmoud* 33:5, 651–658
Energy labeling for electric fans in Malaysia *T M I Mahlia, H H Masjuki, N A Rahim, R Saidur and F M Taha* 33:1, 63–68
Energy-related taxation as an environmental policy tool—the Finnish experience 1990–2003 *L Vehmas* 33:17, 2175–2182
Energy services in sub-Saharan Africa: how conducive is the environment? *P Pillay and A B Sebitosi* 33:16, 2044–2051
Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270
Environmental impacts and benefits of regional power grid interconnections for China *X Guo, S Wang, Y Zheng and F Zhu* 33:14, 1797–1805
An estimation of the Swiss hydropower rent *S Banfi, M Filippini and A Mueller* 33:7, 927–937
A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Rio* 33:10, 1239–1250
Evaluation of energy conservation programs in residential sector using fuzzy logic methodology *W Awad, J O Jaber and R Mamlook* 33:10, 1329–1338
An exploration of the technical feasibility of achieving CO_2 emission reductions in excess of 60% within the UK housing stock by the year 2050 *M Bell, D Johnston and R Lowe* 33:13, 1643–1659
Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743
External costs of electricity production: case study Croatia *N Debrecin, Z Tomsic and M B Vrhovcak* 33:11, 1385–1395
Global experience curves for wind farms *A Faaij, M Junginger and W C Turkenburg* 33:2, 133–150
Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410
Impact assessment of the Electricity Act 2003 on the Indian power sector *S G Deshmukh, S C Kaushik, M Kilshrestha and T Thakur* 33:9, 1187–1198
Impact of electricity prices and volumetric water allocation on energy and groundwater demand management: analysis from Western India *M D Kumar* 33:1, 39–51
The impact of global change on the hydropower potential of Europe: a model-based analysis *G Czisch, B Lehner and S Vassolo* 33:7, 839–855
Impacts of a common green certificate market on electricity and CO_2-emission markets in the Nordic countries *E O Ahlgren and T Unger* 33:16, 2152–2163
The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022
Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459
IT substitution for energy leads to a resilient structure for a survival strategy of Japan's electric power industry *C A Carvajal, M Kishioka and C Watanabe* 33:8, 1069–1084
Letting the (energy) Gini out of the bottle: Lorenz curves of cumulative electricity consumption and Gini coefficients as metrics of energy distribution and equity *A Jacobson, D M Kammen and A D Milman* 33:14, 1825–1832
Liberalisation, consumption heterogeneity and the dynamics of energy prices *M Araújo, P Ferreira and I Soares* 33:17, 2244–2255
Liberalisation and the security of gas supply in the UK *P Wright* 33:17, 2272–2290
Managing a reservoir-based hydro-energy plant: building understanding in the buy and sell decisions in a changing environment *P Davidsen, M Rudd and A van Ackere* 33:7, 939–947
Meeting electrification's social objectives in South Africa, and implications for developing countries *C T Gaunt* 33:10, 1309–1317
A model of household energy services in a low-income rural African village *T Alfstad, G Goldstein, M I Howells, U Remme and D G Victor* 33:14, 1833–1851
Move over! Stock turnover, retrofit and industrial energy efficiency *G Biermans and E Worrell* 33:7, 949–962
Nigeria's electric power sector reform: what should form the key objectives? *O J Ebohon and J Ikeme* 33:9, 1213–1221
Optimal electricity market for wind power *H Holttinen* 33:16, 2052–2063
Optimising trans-national power generation and transmission investments: a Southern African example *B Gonah, B Graeber and R Spalding-Fecher* 33:18, 2337–2349
Performance of Indian power sector during a decade under restructuring: a critique *R Balasubramanian, P S C Nair and D P Sharma* 33:4, 563–576
Policies and market factors driving wind power development in the United States *L Bird, M Bolinger, M Brown, T Gagliano, B Parsons and R Wiser* 33:11, 1397–1407
The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312
Probabilistic analysis of electrical energy costs comparing: production costs for gas, coal and nuclear power plants *D Feretic and Z Tomsic* 33:1, 5–13
Public and private attitudes towards "green" electricity: the case of Swedish wind power *K Ek* 33:13, 1677–1689
Renewable energy policy in South Africa: policy options for renewable electricity *H Winkler* 33:1, 27–38
The residential demand for electricity in Australia: an application of the bounds testing approach to cointegration *P K Narayan and R Smyth* 33:4, 467–474
A review of efforts to restructure Texas' electricity market *J Zarnikau* 33:1, 15–25
The road to green power in Mexico—reflections on the for the large-scale and sustainable implementation of renewable energy *J M Huacuz* 33:16, 2087–2099
Seamless electricity trade between Canada and US Northeast *J-T Bernard, F Clavet and J-C Ondo* 33:14, 1853–1863
Solar supported steam production for power generation in Egypt *M A H El-Sayed* 33:10, 1251–1259
Supply- and demand-side effects of power sector planning with demand-side management options and SO_2 emissions constraints *C O P Marpaung and R M Shrestha* 33:6, 815–825
Techno-economic evaluation of small hydro power plants in Greece: a complete sensitivity analysis *J K Kaldellis, G Korbakis and D S Vlachou* 33:15, 1969–1985
UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716
US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108
Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142
Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298
Who should administer energy-efficiency programs? *G Barbose, C Blumstein and C Goldman* 33:8, 1053–1067
Wind power in Finland up to the year 2025—'soft' scenarios based on expert views *P Tapio and V Varho* 33:15, 1930–1947
Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Emissions trading

Abatement costs of post-Kyoto climate regimes *M den Elzen, P Lucas and D van Vuuren* 33:16, 2138–2151
Industry lobbying and the political economy of GHG trade in the European Union *P Markussen and G T Svendsen* 33:2, 245–255
International markets for greenhouse gas emission reduction policies—possibilities for integrating developing countries *K Halsnæs and A Olhoff* 33:18, 2313–2325
Transaction costs, institutional rigidities and the size of the clean development mechanism *F Jotzo and A Michaelowa* 33:4, 511–523

Energy

Energy partnership: Israel and the Persian Gulf *G Bahgat* 33:5, 671–677
Energy requirements of households in Brazil *C Cohen, M Lenzen and R Schaeffer* 33:4, 555–562

Energy and environment

A strategy to encourage housing associations to invest in energy conservation *C Egmond, R Jonkers and G Kok* 33:18, 2374–2384

Energy and the environment

Abatement costs of post-Kyoto climate regimes *M den Alzen, P Lucas and D van Vuuren* 33:16, 2138–2151
Accelerating residential PV expansion: demand analysis for competitive electricity markets *R Duke, A Payne and R Williams* 33:15, 1912–1929

Assessing policies towards sustainable transport in Europe: an integrated model *T Zachariadis* 33:12, 1509–1525

Brazilian energy policies side-effects on CO_2 emissions reduction *W Chandler, R Schaeffer, M E Schuller and A S Szklo* 33:3, 349–364

Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756

Calculating residential carbon dioxide emissions—a new approach *K Bohan, J Good, L Hughes and K Jafapur* 33:14, 1865–1871

Can the woodfuel supply in sub-Saharan Africa be sustainable? The case of N'Djaména, Chad *M A Abedl-Hamid and R J van der Plas* 33:3, 297–306

Carbon emission coefficient of power consumption in India: baseline determination from the demand side *B Nag and J K Parikh* 33:6, 777–786

Carbon intensity of electricity generation and CDM baseline: case studies of three Chinese provinces *T C Heller, M M May and C Zhang* 33:4, 451–465

Climate-related electricity demand-side management in oil-exporting countries—the case of the United Arab Emirates *M A Al-Iriani* 33:18, 2350–2360

Coal cleaning: a viable strategy for reduced carbon emissions and improved environment in China? *S Glomsrod and W Taoyuan* 33:4, 525–542

Combining interviewing and modeling for end-user energy conservation *G Dürrenberger, D L Goldblatt and C Hartmann* 33:2, 257–271

Consumer lifestyle approach to US energy use and the related CO_2 emissions *S Bin and H Dowlatabadi* 33:2, 197–208

Cooking fuel use patterns in India: 1983–2000 *K S K Kumar and B Viswanathan* 33:8, 1021–1036

The costs of mitigating carbon emissions in China: findings from China MARKAL-MACRO modeling *W Chen* 33:7, 885–896

Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010

Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722

Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798

Diversification and localization of energy systems for sustainable development and energy security *X Li* 33:17, 2237–2243

Double-dividend analysis with SCREEN: an empirical study for Switzerland *C W Frei, P A Haldi and G Sarlos* 33:5, 633–650

Driving forces behind the stagnancy of China's energy-related CO_2 emissions from 1996 to 1999: the relative importance of structural change, intensity change and scale change *S Kaneko, S Matsuoka and L Wu* 33:3, 319–335

Economic, energy, and the environmental impact of the Louisiana Energy Fund *M J Kaiser, W O Olatubi and A G Pulsipher* 33:7, 873–883

Economic and environmental efficiency of district heating plants *P J Agrell and P Bogetoft* 33:10, 1351–1362

Efficiency gains in Danish district heating. Is there anything to learn from benchmarking? *P Fristrup, J Munksgaards and L-L Pade* 33:15, 1986–1997

Electricity consumption, employment and real income in Australia: evidence from multivariate Granger causality tests *P K Narayan and R Smyth* 33:9, 1109–1116

Electricity sector restructuring in India: an environmentally beneficial policy? *R Perkins* 33:4, 439–449

Empirical analysis of the environmental and energy policies in some developing countries using widely employed macroeconomic indicators: the cases of Brazil, China and India *A Focacci* 33:4, 543–554

Endogenous technological change and emissions: the case of the German steel industry *C Lutz, B Meyer, C Nathani and J Schleich* 33:9, 1143–1154

Energy and energy utilization in agricultural sector of Saudi Arabia *I Al-Zaharnah, I Dincer and M M Hussain* 33:11, 1461–1467

Energy and environment in the ASEAN: challenges and opportunities *S K Karki, M d Mann and H Salehfar* 33:4, 499–509

Energy and the World Summit on Sustainable Development: what next? *R Spalding-Fecher, S Mwakasonda and H Winkler* 33:1, 99–112

Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689

Energy demand and environmental taxes: the case of Greece *M L Polemis, V T Rapanos* 33:14, 1781–1788

Energy efficiency—a forgotten goal in the Swedish building sector? *J Holmberg and J Nässén* 33:8, 1037–1051

Energy-related taxation as an environmental policy tool—the Finnish experience 1990–2003 *L Vehmas* 33:17, 2175–2182

Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270

Environmental impacts and benefits of regional power grid interconnections for China *X Guo, S Wang, Y Zheng and F Zhu* 33:14, 1797–1805

Environmental impacts from the solar energy technologies *N Frantzeskaki, V Gekas and T Tsoutsos* 33:3, 289–296

Environmental implications of converting light gas vehicles: the Brazilian experience *L Dondero and J Goldemberg* 33:13, 1703–1708

An estimation of the Swiss hydropower rent *S Banfi, M Filippini and A Mueller* 33:7, 927–937

Evaluation of energy conservation programs in residential sector using fuzzy logic methodology *W Awad, J O Jaber and R Mamlook* 33:10, 1329–1338

An exploration of the technical feasibility of achieving CO_2 emission reductions in excess of 60% within the UK housing stock by the year 2050 *M Bell, D Johnston and R Lowe* 33:13, 1643–1659

Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743

External costs of electricity production: case study Croatia *N Debrecin, Z Tomsic and M B Vrhovcak* 33:11, 1385–1395

Health costs caused by oil extraction air emissions and the benefits from abatement: the case of Kazakhstan *W heijman, I Netalieva and J Wesseler* 33:9, 1169–1177

The household energy gap: examining the divide between habitual- and purchase-related conservation behaviours *S Barr, N Ford and A W Gilg* 33:11, 1425–1444

Implementing a double dividend: recycling ecotaxes towards lower labour taxes *A manresa and F Sancho* 33:12, 1577–1585

The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022

Improving air quality in large cities by substituting natural gas for coal in China: changing idea and incentive policy implications *Y Chang, X Guo, X Mao and Y Peng* 33:3, 307–318

Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459

Integrated resource planning (IRP) and power sector reform in developing countries *A D'Sa* 33:10, 1271–1285

International markets for greenhouse gas emission reduction policies—possibilities for integrating developing countries *K Halsnæs and A Olhoff* 33:18, 2313–2325

The LMDI approach to decomposition analysis: a practical guide *B W Ang* 33:7, 867–871

The marginal damage costs of carbon dioxide emissions: an assessment of the uncertainties *R S J Tol* 33:16, 2064–2074

A model of household energy services in a low-income rural African village *T Alfstad, G Goldstein, M I Howells, U Remme and D G Victor* 33:14, 1833–1851

Multi-criteria analysis of alternative-fuel buses for public transportation *C-W Lin, S Opricovic and G-H Tzeng* 33:11, 1373–1383

A multicriteria approach to evaluate wind energy plants on an Italian island *F Cavallaro and L Ciraolo* 33:2, 235–244

Natural gas as an alternative to crude oil in automotive fuel chains well-to-wheel analysis and transition strategy development *A P C Faaij, M P Hekkert, F H J F Hendriks and M L Neelis* 33:5, 579–594

Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576

Oil consumption and CO_2 emissions in China's road transport: current status, future trends, and policy implications *F An, D He, K He, H Huo, M P Walsh, M Wang and Q Zhang* 33:12, 1499–1507

Optimising trans-national power generation and transmission investments: a Southern African example *B Gonah, B Graeber and R Spalding-Fecher* 33:18, 2337–2349

Paradise recovered: energy production and waste management in island environments *B Hale and M L Miranda* 33:13, 1691–1702

The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312

Potential long-term impacts of changes in US vehicle fuel efficiency standards *R J Bezdek and R M Wendling* 33:3, 407–719

Primary energy demand in Japan: an empirical analysis of long-term trends and future CO_2 emissions *L C Hunt and Y Ninomiya* 33:11, 1409–1424

Project-based mechanisms for emissions reductions: balancing trade-offs with baselines *C Fischer* 33:14, 1807–1823

Public and private attitudes towards "green" electricity: the case of Swedish wind power *K Ek* 33:13, 1677–1689

Renewable energy as a natural gas price hedge: the case of wind *D Berry* 33:6, 799–807

Renewable energy policy goals, programs, and technologies *M Bazilian and P Komor* 33:14, 1873–1881

Second stage energy conservation experience with a textile industry *N S Babu and C Palanichamy* 33:5, 603–609

Solar supported steam production for power generation in Egypt *M A H El-Sayed* 33:10, 1251–1259

Supply- and demand-side effects of power sector planning with demand-side management options and SO_2 emissions constraints *C O P Marpaung and R M Shrestha* 33:6, 815–825

Swedish CO_2-emissions 1900–2010: an exploratory note *B Kriström and T Lundgren* 33:9, 1223–1230

Transaction costs of unilateral CDM projects in India—results from an empirical survey *M Krey* 33:18, 2385–2397

UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716

US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108

Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142

Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298

Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Energy conservation and efficiency

Actuarial pricing of energy efficiency projects: lessons foul and fair *J S Kromer, P Mathew, S Meyers and O Sezgen* 33:10, 1319–1328

Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756

Combining interviewing and modeling for end-user energy conservation *G Dürrenberger, D L Goldblatt and C Hartmann* 33:2, 257–271

Economic, energy, and the environmental impact of the Louisiana Energy Fund *M J Kaiser, W O Olatubi and A G Pulsipher* 33:7, 873–883

Energy efficiency improvement procedures and audit results of electrical, thermal and solar applications in Palestine *I H Ibrik and M M Mahmoud* 33:5, 651–658

ENERGY STAR product specification development framework: using data and analysis to make program decisions *R Clark, A Fanara, C Hershberg, M McWhinney, J Roberson and R Schmeltz* 33:12, 1613–1625

Feebates, rebates and gas-guzzler taxes: a study of incentives for increased fuel economy *D L Greene, J Li, P D Patterson and M Singh* 33:6, 757–775

The household energy gap: examining the divide between habitual- and purchase-related conservation behaviours *S Barr, N Ford and A W Gilg* 33:11, 1425–1444

Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459

Potential long-term impacts of changes in US vehicle fuel efficiency standards *R J Bezdek and R M Wendling* 33:3, 407–719

Seamless electricity trade between Canada and US Northeast *J-T Bernard, F Clavet and J-C Ondo* 33:14, 1853–1863

A search for factors related to successful performance by Rebuild America partnerships *L Ogle-Graham and M Schweitzer* 33:15, 1957–1968

Second stage energy conservation experience with a textile industry *N S Babu and C Palanichamy* 33:5, 603–609

A strategy to encourage housing associations to invest in energy conservation *C Egmond, R Jonkers and G Kok* 33:18, 2374–2384

Energy consumption and efficiency

Accuracy of past projections of US energy consumption *M Desai and B C O'Neill* 33:8, 979–993

Assessing of energy policies based on Turkish agriculture: current status and some implications *C Sayin, M N Mencet and B Ozkan* 33:18, 2361–2373

Assessing policies towards sustainable transport in Europe: an integrated model *T Zachariadis* 33:12, 1509–1525

Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756

Carbon emission coefficient of power consumption in India: baseline determination from the demand side *B Nag and J K Parikh* 33:6, 777–786

Changes in energy intensities of Thai industry between 1981 and 2000: a decomposition analysis *S C Bhattacharyya and A Ussanarassamee* 33:8, 995–1002

Climate-related electricity demand-side management in oil-exporting countries—the case of the United Arab Emirates *M A Al-Iriani* 33:18, 2350–2360

Combining interviewing and modeling for end-user energy conservation *G Dürrenberger, D L Goldblatt and C Hartmann* 33:2, 257–271

Consumer lifestyle approach to US energy use and the related CO_2 emissions *S Bin and H Dowlatabadi* 33:2, 197–208

Cooking fuel use patterns in India: 1983–2000 *K S K Kumar and B Viswanathan* 33:8, 1021–1036

The costs of mitigating carbon emissions in China: findings from China MARKAL-MACRO modeling *W Chen* 33:7, 885–896

Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010

Economic reform, energy, and development: the case of Mexican manufacturing *F Aguayo and K P Gallagher* 33:7, 829–837

Electricity consumption, employment and real income in Australia: evidence from multivariate Granger causality tests *P K Narayan and R Smyth* 33:9, 1109–1116

Electricity consumption and economic growth: evidence from Korea *S-H Yoo* 33:12, 1627–1632

Energy and energy utilization in agricultural sector of Saudi Arabia *I Al-Zaharnah, I Dincer and M M Hussain* 33:11, 1461–1467

Energy demand and environmental taxes: the case of Greece *M L Polemis, V T Rapanos* 33:14, 1781–1788

Energy efficiency—a forgotten goal in the Swedish building sector? *J Holmberg and J Nässén* 33:8, 1037–1051

Energy labeling for electric fans in Malaysia *T M I Mahlia, H H Masjuki, N A Rahim, R Saidur and F M Taha* 33:1, 63–68

ENERGY STAR product specification development framework: using data and analysis to make program decisions *R Clark, A Fanara, C Hershberg, M McWhinney, J Roberson and R Schmeltz* 33:12, 1613–1625

Estimating the Turkish residential—commercial energy output based on genetic algorithm (GA) approaches *O E Canyurt, A Hepbasli, H K Ozturk and Z Utlu* 33:8, 1011–1019

Evaluation of energy conservation programs in residential sector using fuzzy logic methodology *W Awad, J O Jaber and R Mamlook* 33:10, 1329–1338

An exploration of the technical feasibility of achieving CO_2 emission reductions in excess of 60% within the UK housing stock by the year 2050 *M Bell, D Johnston and R Lowe* 33:13, 1643–1659

Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459

Labeling design effort for household refrigerator-freezers in Malaysia *T M I Mahlia, H H Masjuki and R Saidur* 33:5, 611–618

Letting the (energy) Gini out of the bottle: Lorenz curves of cumulative electricity consumption and Gini coefficients as metrics of energy distribution and equity *A Jacobson, D M Kammen and A D Milman* 33:14, 1825–1832

The LMDI approach to decomposition analysis: a practical guide *B W Ang* 33:7, 867–871

The measurement of the energy intensity of manufacturing industries: a principal component analysis *J T Bernard and B Côté* 33:2, 221–223

A model of household energy services in a low-income rural African village *T Alfstad, G Goldstein, M I Howells, U Remme and D G Victor* 33:14, 1833–1851

Move over! Stock turnover, retrofit and industrial energy efficiency *G Biermans and E Worrell* 33:7, 949–962

Natural gas as an alternative to crude oil in automotive fuel chains well-to-wheel analysis and transition strategy development *A P C Faaij, M P Hekkert, F H J F Hendriks and M L Neelis* 33:5, 579–594

Oil consumption and CO_2 emissions in China's road transport: current status, future trends, and policy implications *F An, D He, K He, H Huo, M P Walsh, M Wang and Q Zhang* 33:12, 1499–1507

Primary energy demand in Japan: an empirical analysis of long-term trends and future CO_2 emissions *L C Hunt and Y Ninomiya* 33:11, 1409–1424

Quantifying the external cost of oil consumption within the context of sustainable development *S A Abdel Sabour* 33:6, 809–813

Russian energy efficiency project: lessons learnt from Activities Implemented Jointly pilot phase *A Korppoo* 33:1, 113–126

Short- and long-run demand for energy in Mexico: a cointegration approach *L M Galindo* 33:9, 1179–1185

Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142

Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298

Energy efficiency

Cogeneration: a regulatory framework toward growth *E Cardona and A Piacentino* 33:16, 2100–2111

Efficiency gains in Danish district heating. Is there anything to learn from benchmarking? *P Fristrup, J Munksgaards and L-L Pade* 33:15, 1986–1997

Energy and environment in the ASEAN: challenges and opportunities *S K Karki, M d Mann and H Salehfar* 33:4, 499–509

Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743

Integrated resource planning (IRP) and power sector reform in developing countries *A D'Sa* 33:10, 1271–1285

An international survey of the energy service company (ESCO) industry *E Vine* 33:5, 691–704

Multi-criteria analysis of alternative-fuel buses for public transportation *C-W Lin, S Opricovic and G-H Tzeng* 33:11, 1373–1383

Power sector reforms in Brazil and its impacts on energy efficiency and research and development *G D M Jannuzzi* 33:13, 1753–1762

Promoting energy-efficient products: GEF experience and lessons for market transformation in developing countries *S Birner and E Martinot* 33:14, 1765–1779

Review of US ESCO industry market trends: an empirical analysis of project data *C A Goldman, N C Hopper and J G Osborn* 33:3, 387–405

Who should administer energy-efficiency programs? *G Barbose, C Blumstein and C Goldman* 33:8, 1053–1067

Energy market

Accelerating residential PV expansion: demand analysis for competitive electricity markets *R Duke, A Payne and R Williams* 33:15, 1912–1929

Causes for asymmetric relation between the price of crude oil and refined petroleum products *R K Kaufmann and C Laskowski* 33:12, 1587–1596

Coal cleaning: a viable strategy for reduced carbon emissions and improved environment in China? *S Glomsrod and W Taoyuan* 33:4, 525–542

Cogeneration: a regulatory framework toward growth *E Cardona and A Piacentino* 33:16, 2100–2111

Decision support tool to evaluate alternative policies regulating wind integration into autonomous energy systems *G C Contaxis, J Kabouris and N Zouros* 33:12, 1541–1555

Defining geographic coal markets using price data and shipments data *L Wårell* 33:17, 2216–2230

Efficiency gains in Danish district heating. Is there anything to learn from benchmarking? *P Fristrup, J Munksgaards and L-L Pade* 33:15, 1986–1997

Electricity market modeling trends *A Baillo, A Ramos, M Rivier and M Ventosa* 33:7, 897–913

Electricity restructuring in Turkey *Ö Özkývrak* 33:10, 1339–1350

Electricity tariffs in Hong Kong: what went wrong and what can we do about it? *S Luk* 33:8, 1085–1093

Electric power oligopoly and suspicious minds—a critique of a recently approved merger *M Nilsson* 33:15, 2023–2036

Empirical observations of bidding patterns in Australia's National Electricity Market *D Batten, G Grozev and X Hu* 33:16, 2075–2086

Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270

An estimation of the Swiss hydropower rent *S Banfi, M Filippini and A Mueller* 33:7, 927–937

A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Rio* 33:10, 1239–1250

Feebates, rebates and gas-guzzler taxes: a study of incentives for increased fuel economy *D L Greene, J Li, P D Patterson and M Singh* 33:6, 757–775

Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410

Impact assessment of the Electricity Act 2003 on the Indian power sector *S G Deshmukh, S C Kaushik, M Kilshrestha and T Thakur* 33:9, 1187–1198

Impacts of a common green certificate market on electricity and CO_2-emission markets in the Nordic countries *E O Ahlgren and T Unger* 33:16, 2152–2163

Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459

IT substitution for energy leads to a resilient structure for a survival strategy of Japan's electric power industry *C A Carvajal, M Kishioka and C Watanabe* 33:8, 1069–1084

Liberalisation, consumption heterogeneity and the dynamics of energy prices *M Araújo, P Ferreira and I Soares* 33:17, 2244–2255

Liberalisation and the security of gas supply in the UK *P Wright* 33:17, 2272–2290

Managing a reservoir-based hydro-energy plant: building understanding in the buy and sell decisions in a changing environment *P Davidsen, M Rudd and A van Ackere* 33:7, 939–947

Market value for thermal energy of cogeneration: using shadow price estimation applied to cogeneration systems in Korea *D W An, O S Kwon and W-C Yun* 33:14, 1789–1795

Optimal electricity market for wind power *H Holttinen* 33:16, 2052–2063

Policies and market factors driving wind power development in the United States *L Bird, M Bolinger, M Brown, T Gagliano, B Parsons and R Wiser* 33:11, 1397–1407

The residential demand for electricity in Australia: an application of the bounds testing approach to cointegration *P K Narayan and R Smyth* 33:4, 467–474

Reviewing tax system and its reform plan for the fuel market in South Korea *M K Lee* 33:4, 475–482

A review of efforts to restructure Texas' electricity market *J Zarnikau* 33:1, 15–25

Review of US ESCO industry market trends: an empirical analysis of project data *C A Goldman, N C Hopper and J G Osborn* 33:3, 387–405

Seamless electricity trade between Canada and US Northeast *J-T Bernard, F Clavet and J-C Ondo* 33:14, 1853–1863

Simulating the impacts of a strategic fuels reserve in California *A Ford* 33:4, 483–498

South-East Europe Regional Energy Market: challenges and opportunities for Romania *D Kennedy* 33:17, 2202–2215

Strategic policy and the logistics of crude oil transit in Lithuania *I Pasukeviciute and M Roe* 33:7, 857–866

Techno-economic evaluation of small hydro power plants in Greece: a complete sensitivity analysis *J K Kaldellis, G Korbakis and D S Vlachou* 33:15, 1969–1985

Energy modelling

Coal cleaning: a viable strategy for reduced carbon emissions and improved environment in China? *S Glomsrod and W Taoyuan* 33:4, 525–542

Combining interviewing and modeling for end-user energy conservation *G Dürrenberger, D L Goldblatt and C Hartmann* 33:2, 257–271

Decision support tool to evaluate alternative policies regulating wind integration into autonomous energy systems *G C Contaxis, J Kabouris and N Zouros* 33:12, 1541–1555

Design for renewable energy systems with application to rural areas in Japan *K Kubo, A Lamont and T Nakata* 33:2, 209–219

Double-dividend analysis with SCREEN: an empirical study for Switzerland *C W Frei, P A Haldi and G Sarlos* 33:5, 633–650

Endogenous technological change and emissions: the case of the German steel industry *C Lutz, B Meyer, C Nathani and J Schleich* 33:9, 1143–1154

Energy efficiency—a forgotten goal in the Swedish building sector? *J Holmberg and J Nässén* 33:8, 1037–1051

Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270

Estimating the Turkish residential—commercial energy output based on genetic algorithm (GA) approaches *O E Canyurt, A Hepbasli, H K Ozturk and Z Utlu* 33:8, 1011–1019

Evaluating the impact of three incentive programs on the economics of cofiring willow biomass with coal in New York State *L P Abrahamson, C A Lindsey, P J Tharakan, T A Volk and E H White* 33:3, 337–347

Genetic algorithm approach to estimate transport energy demand in Turkey *H Ceylan and S Haldenbilen* 33:1, 89–98

Impact of electricity prices and volumetric water allocation on energy and groundwater demand management: analysis from Western India *M D Kumar* 33:1, 39–51

Managing a reservoir-based hydro-energy plant: building understanding in the buy and sell decisions in a changing environment *P Davidsen, M Rudd and A van Ackere* 33:7, 939–947

Micro-economic modelling of biofuel system in France to determine tax exemption policy under uncertainty *S Rozakis, J C Sourie* 33:2, 171–182

The mineral economy: a model for the shape of oil production curves *U Bardi* 33:1, 53–61

Move over! Stock turnover, retrofit and industrial energy efficiency *G Biermans and E Worrell* 33:7, 949–962

Natural gas in Brazil's energy matrix: demand for 1995–2010 and usage factors *P S R Alonso, E Fernandes and M V de A Fonseca* 33:3, 365–386

Primary energy demand in Japan: an empirical analysis of long-term trends and future CO_2 emissions *L C Hunt and Y Ninomiya* 33:11, 1409–1424

Project-based mechanisms for emissions reductions: balancing trade-offs with baselines *C Fischer* 33:14, 1807–1823

Renewables portfolio standard and regional energy structure optimisation in China *J Fan, D M Ren and W Sun* 33:3, 279–287

Simulating the impacts of a strategic fuels reserve in California *A Ford* 33:4, 483–498

Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142

Energy policy

Empirical analysis of the environmental and energy policies in some developing countries using widely employed macroeconomic indicators: the cases of Brazil, China and India *A Focacci* 33:4, 543–554

Inclusion of cool roofs in nonresidential Title 24 prescriptive requirements *H Akbari, S Bretz, S Konoopacki and R Levinson* 33:2, 151–170

Industry lobbying and the political economy of GHG trade in the European Union *P Markussen and G T Svendsen* 33:2, 245–255

Reviewing tax system and its reform plan for the fuel market in South Korea *M K Lee* 33:4, 475–482

Transaction costs, institutional rigidities and the size of the clean development mechanism *F Jotzo and A Michaelowa* 33:4, 511–523

Energy policy and analysis

Additional renewable energy growth through small-scale community orientated energy policies *G W Ault, A Cruden, S J Galloway, J J Hain and J R McDonald* 33:9, 1199–1212

Assessing of energy policies based on Turkish agriculture: current status and some implications *C Sayin, M N Mencet and B Ozkan* 33:18, 2361–2373

Brazilian energy policies side-effects on CO_2 emissions reduction *W Chandler, R Schaeffer, M E Schuller and A S Szklo* 33:3, 349–364

Cogeneration: a regulatory framework toward growth *E Cardona and A Piacentino* 33:16, 2100–2111

Cooking fuel use patterns in India: 1983–2000 *K S K Kumar and B Viswanathan* 33:8, 1021–1036

Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010

Decision support tool to evaluate alternative policies regulating wind integration into autonomous energy systems *G C Contaxis, J Kabouris and N Zouros* 33:12, 1541–1555

Double-dividend analysis with SCREEN: an empirical study for Switzerland *C W Frei, P A Haldi and G Sarlos* 33:5, 633–650

Economic, energy, and the environmental impact of the Louisiana Energy Fund *M J Kaiser, W O Olatubi and A G Pulsipher* 33:7, 873–883

Electricity generation: regulatory mechanisms to incentive renewable alternative energy sources in Brazil *C K N Cavaliero and E P Da Silva* 33:13, 1745–1752

Electricity restructuring in Turkey *Ö Özkývrak* 33:10, 1339–1350

Energy and the World Summit on Sustainable Development: what next? *R Spalding-Fecher, S Mwakasonda and H Winkler* 33:1, 99–112

Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689

Energy efficiency improvement procedures and audit results of electrical, thermal and solar applications in Palestine *I H Ibrik and M M Mahmoud* 33:5, 651–658

Energy labeling for electric fans in Malaysia *T M I Mahlia, H H Masjuki, N A Rahim, R Saidur and F M Taha* 33:1, 63–68

ENERGY STAR product specification development framework: using data and analysis to make program decisions *R Clark, A Fanara, C Hershberg, M McWhinney, J Roberson and R Schmeltz* 33:12, 1613–1625

Enforcing the Kyoto Protocol: sanctions and strategic behavior *C Hagem, S Kallbekken, O Mæstad and H Westskog* 33:16, 2112–2122

A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Rio* 33:10, 1239–1250

Evaluation of energy conservation programs in residential sector using fuzzy logic methodology *W Awad, J O Jaber and R Mamlook* 33:10, 1329–1338

Impact assessment of the Electricity Act 2003 on the Indian power sector *S G Deshmukh, S C Kaushik, M Kilshrestha and T Thakur* 33:9, 1187–1198

Impacts of a common green certificate market on electricity and CO_2-emission markets in the Nordic countries *E O Ahlgren and T Unger* 33:16, 2152–2163

The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022

International markets for greenhouse gas emission reduction policies—possibilities for integrating developing countries *K Halsnæs and A Olhoff* 33:18, 2313–2325

An international survey of the energy service company (ESCO) industry *E Vine* 33:5, 691–704

Labeling design effort for household refrigerator-freezers in Malaysia *T M I Mahlia, H H Masjuki and R Saidur* 33:5, 611–618

Managing a reservoir-based hydro-energy plant: building understanding in the buy and sell decisions in a changing environment *P Davidsen, M Rudd and A van Ackere* 33:7, 939–947

Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576

Policies and market factors driving wind power development in the United States *L Bird, M Bolinger, M Brown, T Gagliano, B Parsons and R Wiser* 33:11, 1397–1407

Potential long-term impacts of changes in US vehicle fuel efficiency standards *R J Bezdek and R M Wendling* 33:3, 407–719

Regulation and efficiency: an empirical analysis of the United Kingdom continental shelf petroleum industry *H A Kashani* 33:7, 915–925

Renewable energy policy goals, programs, and technologies *M Bazilian and P Komor* 33:14, 1873–1881

Renewable energy policy in South Africa: policy options for renewable electricity *H Winkler* 33:1, 27–38

A review of efforts to restructure Texas' electricity market *J Zarnikau* 33:1, 15–25

Russian energy efficiency project: lessons learnt from Activities Implemented Jointly pilot phase *A Korppoo* 33:1, 113–126

A search for factors related to successful performance by Rebuild America partnerships *L Ogle-Graham and M Schweitzer* 33:15, 1957–1968

Second stage energy conservation experience with a textile industry *N S Babu and C Palanichamy* 33:5, 603–609

South-East Europe Regional Energy Market: challenges and opportunities for Romania *D Kennedy* 33:17, 2202–2215

State intervention causing inefficiency: an empirical analysis of the Norwegian Continental Shelf *H A Kashani* 33:15, 1998–2009

Strategic policy and the logistics of crude oil transit in Lithuania *I Pasukeviciute and M Roe* 33:7, 857–866

UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716

US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108

The welfare effects and the distributive impact of carbon taxation on Italian households *S Tiezzi* 33:12, 1597–1612
Wind power in Finland up to the year 2025—'soft' scenarios based on expert views *P Tapio and V Varho* 33:15, 1930–1947

Energy security and world trade

Defining geographic coal markets using price data and shipments data *L Wårell* 33:17, 2216–2230
Liberalisation and the security of gas supply in the UK *P Wright* 33:17, 2272–2290
Seamless electricity trade between Canada and US Northeast *J-T Bernard, F Clavet and J-C Ondo* 33:14, 1853–1863
Simulating the impacts of a strategic fuels reserve in California *A Ford* 33:4, 483–498
UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716

Energy supply

The residential demand for electricity in Australia: an application of the bounds testing approach to cointegration *P K Narayan and R Smyth* 33:4, 467–474

Energy supply and demand

Accelerating residential PV expansion: demand analysis for competitive electricity markets *R Duke, A Payne and R Williams* 33:15, 1912–1929
Assessing of energy policies based on Turkish agriculture: current status and some implications *C Sayin, M N Mencet and B Ozkan* 33:18, 2361–2373
Assessing policies towards sustainable transport in Europe: an integrated model *T Zachariadis* 33:12, 1509–1525
Availability of kerosene to rural households: a case study from India *P Malhotra, R C Pal, I H Rehman and P B Singh* 33:17, 2165–2174
Can the woodfuel supply in sub-Saharan Africa be sustainable? The case of N'Djaména, Chad *M A Abedl-Hamid and R J van der Plas* 33:3, 297–306
Climate-related electricity demand-side management in oil-exporting countries—the case of the United Arab Emirates *M A Al-Iriani* 33:18, 2350–2360
Economic and policy implications of public support for ethanol production in California's San Joaquin Valley *E Burnes, J W Hagen and D Wichelns* 33:9, 1155–1167
Electricity market modeling trends *A Baillo, A Ramos, M Rivier and M Ventosa* 33:7, 897–913
Electrification co-operatives bring new light to rural Tanzania *W Chambala, M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1299–1307
Energy demand, economic growth, and energy efficiency – the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689
An exploration of the technical feasibility of achieving CO_2 emission reductions in excess of 60% within the UK housing stock by the year 2050 *M Bell, D Johnston and R Lowe* 33:13, 1643–1659
Genetic algorithm approach to estimate transport energy demand in Turkey *H Ceylan and S Haldenbilen* 33:1, 89–98
Impact of electricity prices and volumetric water allocation on energy and groundwater demand management: analysis from Western India *M D Kumar* 33:1, 39–51
The impact of global change on the hydropower potential of Europe: a model-based analysis *G Czisch, B Lehner and S Vassolo* 33:7, 839–855
Integrated resource planning (IRP) and power sector reform in developing countries *A D'Sa* 33:10, 1271–1285
Nigeria's electric power sector reform: what should form the key objectives? *O J Ebohon and J Ikeme* 33:9, 1213–1221
The political economy of trans-Pakistan gas pipeline project: assessing the political and economic risks for India *S Pandian* 33:5, 659–670
The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312
Probabilistic analysis of electrical energy costs comparing: production costs for gas, coal and nuclear power plants *D Feretic and Z Tomsic* 33:1, 5–13
Renewables portfolio standard and regional energy structure optimisation in China *J Fan, D M Ren and W Sun* 33:3, 279–287
Short- and long-run demand for energy in Mexico: a cointegration approach *L M Galindo* 33:9, 1179–1185
Simulating the impacts of a strategic fuels reserve in California *A Ford* 33:4, 483–498
Supply- and demand-side effects of power sector planning with demand-side management options and SO_2 emissions constraints *C O P Marpaung and R M Shrestha* 33:6, 815–825

Energy taxes

Additional renewable energy growth through small-scale community orientated energy policies *G W Ault, A Cruden, S J Galloway, J J Hain and J R McDonald* 33:9, 1199–1212
Coal cleaning: a viable strategy for reduced carbon emissions and improved environment in China? *S Glomsrod and W Taoyuan* 33:4, 525–542
Electricity restructuring in Turkey *Ö Özkývrak* 33:10, 1339–1350
Electricity tariffs in Hong Kong: what went wrong and what can we do about it? *S Luk* 33:8, 1085–1093
Electrification co-operatives bring new light to rural Tanzania *W Chambala, M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1299–1307
Energy demand and environmental taxes: the case of Greece *M L Polemis, V T Rapanos* 33:14, 1781–1788
Energy-related taxation as an environmental policy tool—the Finnish experience 1990–2003 *L Vehmas* 33:17, 2175–2182
An estimation of the Swiss hydropower rent *S Banfi, M Filippini and A Mueller* 33:7, 927–937
Evaluating the impact of three incentive programs on the economics of cofiring willow biomass with coal in New York State *L P Abrahamson, C A Lindsey, P J Tharakan, T A Volk and E H White* 33:3, 337–347
Feebates, rebates and gas-guzzler taxes: a study of incentives for increased fuel economy *D L Greene, J Li, P D Patterson and M Singh* 33:6, 757–775
Impact of electricity prices and volumetric water allocation on energy and groundwater demand management: analysis from Western India *M D Kumar* 33:1, 39–51
Implementing a double dividend: recycling ecotaxes towards lower labour taxes *A manresa and F Sancho* 33:12, 1577–1585
Market value for thermal energy of cogeneration: using shadow price estimation applied to cogeneration systems in Korea *D W An, O S Kwon and W-C Yun* 33:14, 1789–1795
Meeting electrification's social objectives in South Africa, and implications for developing countries *C T Gaunt* 33:10, 1309–1317
Micro-economic modelling of biofuel system in France to determine tax exemption policy under uncertainty *S Rozakis, J C Sourie* 33:2, 171–182
Reviewing tax system and its reform plan for the fuel market in South Korea *M K Lee* 33:4, 475–482
South-East Europe Regional Energy Market: challenges and opportunities for Romania *D Kennedy* 33:17, 2202–2215
The welfare effects and the distributive impact of carbon taxation on Italian households *S Tiezzi* 33:12, 1597–1612

Energy technology

Are new institutional economics enough? Promoting photovoltaics in India's agricultural sector *V Radulovic* 33:14, 1883–1899
Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756
Determination of the optimal installation capacity of small hydro-power plants through the use of technical, economic and reliability indices *F Forouzbakhsh, S M H Hosseini and M Rahimpoor* 33:15, 1948–1956
Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798
Double-dividend analysis with SCREEN: an empirical study for Switzerland *C W Frei, P A Haldi and G Sarlos* 33:5, 633–650
Economic and environmental efficiency of district heating plants *P J Agrell and P Bogetoft* 33:10, 1351–1362
Economic reform, energy, and development: the case of Mexican manufacturing *F Aguayo and K P Gallagher* 33:7, 829–837
Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689
Energy efficiency improvement procedures and audit results of electrical, thermal and solar applications in Palestine *I H Ibrik and M M Mahmoud* 33:5, 651–658
Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270
Environmental impacts from the solar energy technologies *N Frantzeskaki, V Gekas and T Tsoutsos* 33:3, 289–296
Global experience curves for wind farms *A Faaij, M Junginger and W C Turkenburg* 33:2, 133–150

The impact of global change on the hydropower potential of Europe: a model-based analysis *G Czisch, B Lehner and S Vassolo* 33:7, 839–855

Impacts of a common green certificate market on electricity and CO_2-emission markets in the Nordic countries *E O Ahlgren and T Unger* 33:16, 2152–2163

Inclusion of cool roofs in nonresidential Title 24 prescriptive requirements *H Akbari, S Bretz, S Konoopacki and R Levinson* 33:2, 151–170

Managing a reservoir-based hydro-energy plant: building understanding in the buy and sell decisions in a changing environment *P Davidsen, M Rudd and A van Ackere* 33:7, 939–947

Meeting electrification's social objectives in South Africa, and implications for developing countries *C T Gaunt* 33:10, 1309–1317

A model of household energy services in a low-income rural African village *T Alfstad, G Goldstein, M I Howells, U Remme and D G Victor* 33:14, 1833–1851

Move over! Stock turnover, retrofit and industrial energy efficiency *G Biermans and E Worrell* 33:7, 949–962

A multicriteria approach to evaluate wind energy plants on an Italian island *F Cavallaro and L Ciraolo* 33:2, 235–244

Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576

Paradise recovered: energy production and waste management in island environments *B Hale and M L Miranda* 33:13, 1691–1702

The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312

Renewable energy policy goals, programs, and technologies *M Bazilian and P Komor* 33:14, 1873–1881

Social attitude towards wind energy applications in Greece *J K Kaldellis* 33:5, 595–602

Solar supported steam production for power generation in Egypt *M A H El-Sayed* 33:10, 1251–1259

Techno-economic evaluation of small hydro power plants in Greece: a complete sensitivity analysis *J K Kaldellis, G Korbakis and D S Vlachou* 33:15, 1969–1985

Technological change and petroleum exploration in the Gulf of Mexico *T A Grigalunas, D Jin, S Managi and J J Opaluch* 33:5, 619–632

UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716

UK innovation systems for new and renewable energy technologies: drivers, barriers and systems failures *D Anderson, A Arnall, A Chase, T J Foxon, R Gross and J Howes* 33:16, 2123–2137

Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298

Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Financial risk

Actuarial pricing of energy efficiency projects: lessons foul and fair *J S Kromer, P Mathew, S Meyers and O Sezgen* 33:10, 1319–1328

Economic and policy implications of public support for ethanol production in California's San Joaquin Valley *E Burnes, J W Hagen and D Wichelns* 33:9, 1155–1167

Fossil fuels

Calculating residential carbon dioxide emissions—a new approach *K Bohan, J Good, L Hughes and K Jafapur* 33:14, 1865–1871

Can the woodfuel supply in sub-Saharan Africa be sustainable? The case of N'Djaména, Chad *M A Abedl-Hamid and R J van der Plas* 33:3, 297–306

Cooking fuel use patterns in India: 1983–2000 *K S K Kumar and B Viswanathan* 33:8, 1021–1036

Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010

Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722

Diversification and localization of energy systems for sustainable development and energy security *X Li* 33:17, 2237–2243

Energy-related taxation as an environmental policy tool—the Finnish experience 1990–2003 *L Vehmas* 33:17, 2175–2182

Enforcing the Kyoto Protocol: sanctions and strategic behavior *C Hagem, S Kallbekken, O Mæstad and H Westskog* 33:16, 2112–2122

Environmental impacts and benefits of regional power grid interconnections for China *X Guo, S Wang, Y Zheng and F Zhu* 33:14, 1797–1805

Micro-economic modelling of biofuel system in France to determine tax exemption policy under uncertainty *S Rozakis, J C Sourie* 33:2, 171–182

A model of household energy services in a low-income rural African village *T Alfstad, G Goldstein, M I Howells, U Remme and D G Victor* 33:14, 1833–1851

Multi-criteria analysis of alternative-fuel buses for public transportation *C-W Lin, S Opricovic and G-H Tzeng* 33:11, 1373–1383

Natural gas as an alternative to crude oil in automotive fuel chains well-to-wheel analysis and transition strategy development *A P C Faaij, M P Hekkert, F H J F Hendriks and M L Neelis* 33:5, 579–594

Regulation and efficiency: an empirical analysis of the United Kingdom continental shelf petroleum industry *H A Kashani* 33:7, 915–925

Reviewing tax system and its reform plan for the fuel market in South Korea *M K Lee* 33:4, 475–482

Technological change and petroleum exploration in the Gulf of Mexico *T A Grigalunas, D Jin, S Managi and J J Opaluch* 33:5, 619–632

The welfare effects and the distributive impact of carbon taxation on Italian households *S Tiezzi* 33:12, 1597–1612

Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Global warming

Energy demand, economic growth, and energy efficiency – the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689

Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270

Greenhouse gases

Abatement costs of post-Kyoto climate regimes *M den Alzen, P Lucas and D van Vuuren* 33:16, 2138–2151

Assessing policies towards sustainable transport in Europe: an integrated model *T Zachariadis* 33:12, 1509–1525

Brazilian energy policies side-effects on CO_2 emissions reduction *W Chandler, R Schaeffer, M E Schuller and A S Szklo* 33:3, 349–364

Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756

Calculating residential carbon dioxide emissions—a new approach *K Bohan, J Good, L Hughes and K Jafapur* 33:14, 1865–1871

Carbon emission coefficient of power consumption in India: baseline determination from the demand side *B Nag and J K Parikh* 33:6, 777–786

Carbon intensity of electricity generation and CDM baseline: case studies of three Chinese provinces *T C Heller, M M May and C Zhang* 33:4, 451–465

Coal cleaning: a viable strategy for reduced carbon emissions and improved environment in China? *S Glomsrod and W Taoyuan* 33:4, 525–542

Consumer lifestyle approach to US energy use and the related CO_2 emissions *S Bin and H Dowlatabadi* 33:2, 197–208

The costs of mitigating carbon emissions in China: findings from China MARKAL-MACRO modeling *W Chen* 33:7, 885–896

Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010

Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722

Diversification and localization of energy systems for sustainable development and energy security *X Li* 33:17, 2237–2243

Double-dividend analysis with SCREEN: an empirical study for Switzerland *C W Frei, P A Haldi and G Sarlos* 33:5, 633–650

Driving forces behind the stagnancy of China's energy-related CO_2 emissions from 1996 to 1999: the relative importance of structural change, intensity change and scale change *S Kaneko, S Matsuoka and L Wu* 33:3, 319–335

Economic, energy, and the environmental impact of the Louisiana Energy Fund *M J Kaiser, W O Olatubi and A G Pulsipher* 33:7, 873–883

Electricity consumption, employment and real income in Australia: evidence from multivariate Granger causality tests *P K Narayan and R Smyth* 33:9, 1109–1116

Empirical analysis of the environmental and energy policies in some developing countries using widely employed macroeconomic in-

dicators: the cases of Brazil, China and India *A Focacci* 33:4, 543–554
Endogenous technological change and emissions: the case of the German steel industry *C Lutz, B Meyer, C Nathani and J Schleich* 33:9, 1143–1154
Energy and environment in the ASEAN: challenges and opportunities *S K Karki, M d Mann and H Salehfar* 33:4, 499–509
Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689
Energy demand and environmental taxes: the case of Greece *M L Polemis, V T Rapanos* 33:14, 1781–1788
Energy efficiency—a forgotten goal in the Swedish building sector? *J Holmberg and J Nässén* 33:8, 1037–1051
Energy-related taxation as an environmental policy tool—the Finnish experience 1990–2003 *L Vehmas* 33:17, 2175–2182
Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270
Environmental impacts and benefits of regional power grid interconnections for China *X Guo, S Wang, Y Zheng and F Zhu* 33:14, 1797–1805
Environmental impacts from the solar energy technologies *N Frantzeskaki, V Gekas and T Tsoutsos* 33:3, 289–296
Environmental implications of converting light gas vehicles: the Brazilian experience *L Dondero and J Goldemberg* 33:13, 1703–1708
An exploration of the technical feasibility of achieving CO_2 emission reductions in excess of 60% within the UK housing stock by the year 2050 *M Bell, D Johnston and R Lowe* 33:13, 1643–1659
Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743
External costs of electricity production: case study Croatia *N Debrecin, Z Tomsic and M B Vrhovcak* 33:11, 1385–1395
Health costs caused by oil extraction air emissions and the benefits from abatement: the case of Kazakhstan *W heijman, I Netalieva and J Wesseler* 33:9, 1169–1177
Implementing a double dividend: recycling ecotaxes towards lower labour taxes *A manresa and F Sancho* 33:12, 1577–1585
The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022
Improving air quality in large cities by substituting natural gas for coal in China: changing idea and incentive policy implications *Y Chang, X Guo, X Mao and Y Peng* 33:3, 307–318
Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459
Industry lobbying and the political economy of GHG trade in the European Union *P Markussen and G T Svendsen* 33:2, 245–255
International markets for greenhouse gas emission reduction policies—possibilities for integrating developing countries *K Halsnæs and A Olhoff* 33:18, 2313–2325
The LMDI approach to decomposition analysis: a practical guide *B W Ang* 33:7, 867–871
The marginal damage costs of carbon dioxide emissions: an assessment of the uncertainties *R S J Tol* 33:16, 2064–2074
A model of household energy services in a low-income rural African village *T Alfstad, G Goldstein, M I Howells, U Remme and D G Victor* 33:14, 1833–1851
Multi-criteria analysis of alternative-fuel buses for public transportation *C-W Lin, S Opricovic and G-H Tzeng* 33:11, 1373–1383
Natural gas as an alternative to crude oil in automotive fuel chains well-to-wheel analysis and transition strategy development *A P C Faaij, M P Hekkert, F H J F Hendriks and M L Neelis* 33:5, 579–594
Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576
Oil consumption and CO_2 emissions in China's road transport: current status, future trends, and policy implications *F An, D He, K He, H Huo, M P Walsh, M Wang and Q Zhang* 33:12, 1499–1507
Optimising trans-national power generation and transmission investments: a Southern African example *B Gonah, B Graeber and R Spalding-Fecher* 33:18, 2337–2349
Paradise recovered: energy production and waste management in island environments *B Hale and M L Miranda* 33:13, 1691–1702
Primary energy demand in Japan: an empirical analysis of long-term trends and future CO_2 emissions *L C Hunt and Y Ninomiya* 33:11, 1409–1424
Project-based mechanisms for emissions reductions: balancing trade-offs with baselines *C Fischer* 33:14, 1807–1823
Renewable energy policy goals, programs, and technologies *M Bazilian and P Komor* 33:14, 1873–1881
Second stage energy conservation experience with a textile industry *N S Babu and C Palanichamy* 33:5, 603–609
The simple analytics of greenhouse gas emission intensity reduction targets *C D Kolstad* 33:17, 2231–2236
Solar supported steam production for power generation in Egypt *M A H El-Sayed* 33:10, 1251–1259
Supply- and demand-side effects of power sector planning with demand-side management options and SO_2 emissions constraints *C O P Marpaung and R M Shrestha* 33:6, 815–825
Swedish CO_2-emissions 1900-2010: an exploratory note *B Kriström and T Lundgren* 33:9, 1223–1230
Transaction costs of unilateral CDM projects in India—results from an empirical survey *M Krey* 33:18, 2385–2397
UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716
US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108
Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142
Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298
The welfare effects and the distributive impact of carbon taxation on Italian households *S Tiezzi* 33:12, 1597–1612
Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Green power

Additional renewable energy growth through small-scale community orientated energy policies *G W Ault, A Cruden, S J Galloway, J J Hain and J R McDonald* 33:9, 1199–1212
The early adoption of green power by Dutch households An empirical exploration of factors influencing the early adoption of green electricity for domestic purposes *K Arkesteijn and L Oerlemans* 33:2, 183–196
A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Rio* 33:10, 1239–1250
Evaluating the impact of three incentive programs on the economics of cofiring willow biomass with coal in New York State *L P Abrahamson, C A Lindsey, P J Tharakan, T A Volk and E H White* 33:3, 337–347
Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410
Impacts of a common green certificate market on electricity and CO_2-emission markets in the Nordic countries *E O Ahlgren and T Unger* 33:16, 2152–2163
Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576
Policies and market factors driving wind power development in the United States *L Bird, M Bolinger, M Brown, T Gagliano, B Parsons and R Wiser* 33:11, 1397–1407
Public and private attitudes towards "green" electricity: the case of Swedish wind power *K Ek* 33:13, 1677–1689
The road to green power in Mexico—reflections on the prospects for the large-scale and sustainable implementation of renewable energy *J M Huacuz* 33:16, 2087–2099

Kyoto protocol

Abatement costs of post-Kyoto climate regimes *M den Alzen, P Lucas and D van Vuuren* 33:16, 2138–2151
Croatia energy planning and Kyoto Protocol *Ž Bogdan, N Duic, F Juretic and M Zeljko* 33:8, 1003–1010
Enforcing the Kyoto Protocol: sanctions and strategic behavior *C Hagem, S Kallbekken, O Mæstad and H Westskog* 33:16, 2112–2122
The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022

Industry lobbying and the political economy of GHG trade in the European Union *P Markussen and G T Svendsen* 33:2, 245–255

International markets for greenhouse gas emission reduction policies—possibilities for integrating developing countries *K Halsnæs and A Olhoff* 33:18, 2313–2325

Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576

Primary energy demand in Japan: an empirical analysis of long-term trends and future CO_2 emissions *L C Hunt and Y Ninomiya* 33:11, 1409–1424

Russian energy efficiency project: lessons learnt from Activities Implemented Jointly pilot phase *A Korppoo* 33:1, 113–126

Transaction costs, institutional rigidities and the size of the clean development mechanism *F Jotzo and A Michaelowa* 33:4, 511–523

Transaction costs of unilateral CDM projects in India—results from an empirical survey *M Krey* 33:18, 2385–2397

US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108

LDCs

Benchmarking and incentive regulation of quality of service: an application to the UK electricity distribution networks *D Giannakis, T Jamasb and M Pollitt* 33:17, 2256–2271

Business opportunities and dynamic competition through distributed generation in primary electricity distribution networks *R Raineri, S Ríos and R Vásquez* 33:17, 2191–2201

Electricity market modeling trends *A Baillo, A Ramos, M Rivier and M Ventosa* 33:7, 897–913

Electricity sector restructuring in India: an environmentally beneficial policy? *R Perkins* 33:4, 439–449

Electricity tariffs in Hong Kong: what went wrong and what can we do about it? *S Luk* 33:8, 1085–1093

Electrification co-operatives bring new light to rural Tanzania *W Chambala, M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1299–1307

IT substitution for energy leads to a resilient structure for a survival strategy of Japan's electric power industry *C A Carvajal, M Kishioka and C Watanabe* 33:8, 1069–1084

A review of efforts to restructure Texas' electricity market *J Zarnikau* 33:1, 15–25

Review of US ESCO industry market trends: an empirical analysis of project data *C A Goldman, N C Hopper and J G Osborn* 33:3, 387–405

National and regional energy policy and government policy

A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Río* 33:10, 1239–1250

National and regional energy profiles and government policy

Accuracy of past projections of US energy consumption *M Desai and B C O'Neill* 33:8, 979–993

Additional renewable energy growth through small-scale community orientated energy policies *G W Ault, A Cruden, S J Galloway, J J Hain and J R McDonald* 33:9, 1199–1212

Are new institutional economics enough? Promoting photovoltaics in India's agricultural sector *V Radulovic* 33:14, 1883–1899

Assessing of energy policies based on Turkish agriculture: current status and some implications *C Sayin, M N Mencet and B Ozkan* 33:18, 2361–2373

Availability of kerosene to rural households: a case study from India *P Malhotra, R C Pal, I H Rehman and P B Singh* 33:17, 2165–2174

Brazilian energy policies side-effects on CO_2 emissions reduction *W Chandler, R Schaeffer, M E Schuller and A S Szklo* 33:3, 349–364

Calculating residential carbon dioxide emissions—a new approach *K Bohan, J Good, L Hughes and K Jafapur* 33:14, 1865–1871

Carbon intensity of electricity generation and CDM baseline: case studies of three Chinese provinces *T C Heller, M M May and C Zhang* 33:4, 451–465

Changes in energy intensities of Thai industry between 1981 and 2000: a decomposition analysis *S C Bhattacharyya and A Ussanarassamee* 33:8, 995–1002

Consumer lifestyle approach to US energy use and the related CO_2 emissions *S Bin and H Dowlatabadi* 33:2, 197–208

Cooking fuel use patterns in India: 1983–2000 *K S K Kumar and B Viswanathan* 33:8, 1021–1036

The costs of mitigating carbon emissions in China: findings from China MARKAL-MACRO modeling *W Chen* 33:7, 885–896

Economic, energy, and the environmental impact of the Louisiana Energy Fund *M J Kaiser, W O Olatubi and A G Pulsipher* 33:7, 873–883

Economic and policy implications of public support for ethanol production in California's San Joaquin Valley *E Burnes, J W Hagen and D Wichelns* 33:9, 1155–1167

Economic reform, energy, and development: the case of Mexican manufacturing *F Aguayo and K P Gallagher* 33:7, 829–837

Electricity generation: regulatory mechanisms to incentive renewable alternative energy sources in Brazil *C K N Cavaliero and E P Da Silva* 33:13, 1745–1752

Electricity restructuring in Turkey *Ö Özkývrak* 33:10, 1339–1350

Electricity sector restructuring in India: an environmentally beneficial policy? *R Perkins* 33:4, 439–449

Electricity tariffs in Hong Kong: what went wrong and what can we do about it? *S Luk* 33:8, 1085–1093

Electrification co-operatives bring new light to rural Tanzania *W Chambala, M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1299–1307

Empirical analysis of the environmental and energy policies in some developing countries using widely employed macroeconomic indicators: the cases of Brazil, China and India *A Focacci* 33:4, 543–554

Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689

Energy labeling for electric fans in Malaysia *T M I Mahlia, H H Masjuki, N A Rahim, R Saidur and F M Taha* 33:1, 63–68

Energy services in sub-Saharan Africa: how conducive is the environment? *P Pillay and A B Sebitosi* 33:16, 2044–2051

ENERGY STAR product specification development framework: using data and analysis to make program decisions *R Clark, A Fanara, C Hershberg, M McWhinney, J Roberson and R Schmeltz* 33:12, 1613–1625

Environmental impacts and benefits of regional power grid interconnections for China *X Guo, S Wang, Y Zheng and F Zhu* 33:14, 1797–1805

Estimating the Turkish residential—commercial energy output based on genetic algorithm (GA) approaches *O E Canyurt, A Hepbasli, H K Ozturk and Z Utlu* 33:8, 1011–1019

Explaining wind power planning outcomes: Some findings from a study in England and Wales *D Toke* 33:12, 1527–1539

Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743

Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410

Impact assessment of the Electricity Act 2003 on the Indian power sector *S G Deshmukh, S C Kaushik, M Kilshrestha and T Thakur* 33:9, 1187–1198

The impact of global change on the hydropower potential of Europe: a model-based analysis *G Czisch, B Lehner and S Vassolo* 33:7, 839–855

Inclusion of cool roofs in nonresidential Title 24 prescriptive requirements *H Akbari, S Bretz, S Konoopacki and R Levinson* 33:2, 151–170

Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459

An international survey of the energy service company (ESCO) industry *E Vine* 33:5, 691–704

Labeling design effort for household refrigerator-freezers in Malaysia *T M I Mahlia, H H Masjuki and R Saidur* 33:5, 611–618

Letting the (energy) Gini out of the bottle: Lorenz curves of cumulative electricity consumption and Gini coefficients as metrics of energy distribution and equity *A Jacobson, D M Kammen and A D Milman* 33:14, 1825–1832

Liberalisation and the security of gas supply in the UK *P Wright* 33:17, 2272–2290

Meeting electrification's social objectives in South Africa, and implications for developing countries *C T Gaunt* 33:10, 1309–1317

Micro-economic modelling of biofuel system in France to determine tax exemption policy under uncertainty *S Rozakis, J C Sourie* 33:2, 171–182

Natural gas in Brazil's energy matrix: demand for 1995–2010 and usage factors *P S R Alonso, E Fernandes and M V de A Fonseca* 33:3, 365–386
Nigeria's electric power sector reform: what should form the key objectives? *O J Ebohon and J Ikeme* 33:9, 1213–1221
Optimal electricity market for wind power *H Holttinen* 33:16, 2052–2063
Paradise recovered: energy production and waste management in island environments *B Hale and M L Miranda* 33:13, 1691–1702
Performance of Indian power sector during a decade under restructuring: a critique *R Balasubramanian, P S C Nair and D P Sharma* 33:4, 563–576
Policies and market factors driving wind power development in the United States *L Bird, M Bolinger, M Brown, T Gagliano, B Parsons and R Wiser* 33:11, 1397–1407
The political economy of trans-Pakistan gas pipeline project: assessing the political and economic risks for India *S Pandian* 33:5, 659–670
Power sector reforms in Brazil and its impacts on energy efficiency and research and development *G D M Jannuzzi* 33:13, 1753–1762
Primary energy demand in Japan: an empirical analysis of long-term trends and future CO_2 emissions *L C Hunt and Y Ninomiya* 33:11, 1409–1424
Reducing subsidies on household fuels in India: how will it affect the poor? *S Gangopadhyah, B Ramaswami and W Wadhwa* 33:18, 2326–2336
Regulation and efficiency: an empirical analysis of the United Kingdom continental shelf petroleum industry *H A Kashani* 33:7, 915–925
Renewable energy policy in South Africa: policy options for renewable electricity *H Winkler* 33:1, 27–38
Renewables portfolio standard and regional energy structure optimisation in China *J Fan, D M Ren and W Sun* 33:3, 279–287
Reviewing tax system and its reform plan for the fuel market in South Korea *M K Lee* 33:4, 475–482
A review of efforts to restructure Texas' electricity market *J Zarnikau* 33:1, 15–25
The rise and fall of German hard coal subsidies *K Storchmann* 33:11, 1469–1492
The road to green power in Mexico—reflections on the prospects for the large-scale and sustainable implementation of renewable energy *J M Huacuz* 33:16, 2087–2099
Russian energy efficiency project: lessons learnt from Activities Implemented Jointly pilot phase *A Korppoo* 33:1, 113–126
Seamless electricity trade between Canada and US Northeast *J-T Bernard, F Clavet and J-C Ondo* 33:14, 1853–1863
The simple analytics of greenhouse gas emission intensity reduction targets *C D Kolstad* 33:17, 2231–2236
State intervention causing inefficiency: an empirical analysis of the Norwegian Continental Shelf *H A Kashani* 33:15, 1998–2009
Strategic policy and the logistics of crude oil transit in Lithuania *I Pasukeviciute and M Roe* 33:7, 857–866
Supply- and demand-side effects of power sector planning with demand-side management options and SO_2 emissions constraints *C O P Marpaung and R M Shrestha* 33:6, 815–825
Technological change and petroleum exploration in the Gulf of Mexico *T A Grigalunas, D Jin, S Managi and J J Opaluch* 33:5, 619–632
UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716
US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108
Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142
The welfare effects and the distributive impact of carbon taxation on Italian households *S Tiezzi* 33:12, 1597–1612
Who should administer energy-efficiency programs? *G Barbose, C Blumstein and C Goldman* 33:8, 1053–1067
Wind power in Finland up to the year 2025—'soft' scenarios based on expert views *P Tapio and V Varho* 33:15, 1930–1947

Nuclear power

The costs of mitigating carbon emissions in China: findings from China MARKAL-MACRO modeling *W Chen* 33:7, 885–896
Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270
Probabilistic analysis of electrical energy costs comparing: production costs for gas, coal and nuclear power plants *D Feretic and Z Tomsic* 33:1, 5–13
Swedish CO_2-emissions 1900–2010: an exploratory note *B Kriström and T Lundgren* 33:9, 1223–1230
US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108

Oil

Availability of kerosene to rural households: a case study from India *P Malhotra, R C Pal, I H Rehman and P B Singh* 33:17, 2165–2174
Climate-related electricity demand-side management in oil-exporting countries—the case of the United Arab Emirates *M A Al-Iriani* 33:18, 2350–2360
Energy demand and environmental taxes: the case of Greece *M L Polemis, V T Rapanos* 33:14, 1781–1788
Health costs caused by oil extraction air emissions and the benefits from abatement: the case of Kazakhstan *W heijman, I Netalieva and J Wesseler* 33:9, 1169–1177
The mineral economy: a model for the shape of oil production curves *U Bardi* 33:1, 53–61
Oil consumption and CO_2 emissions in China's road transport: current status, future trends, and policy implications *F An, D He, K He, H Huo, M P Walsh, M Wang and Q Zhang* 33:12, 1499–1507
Quantifying the external cost of oil consumption within the context of sustainable development *S A Abdel Sabour* 33:6, 809–813
Strategic policy and the logistics of crude oil transit in Lithuania *I Pasukeviciute and M Roe* 33:7, 857–866

Oil and gas

Assessing of energy policies based on Turkish agriculture: current status and some implications *C Sayin, M N Mencet and B Ozkan* 33:18, 2361–2373
Assessing policies towards sustainable transport in Europe: an integrated model *T Zachariadis* 33:12, 1509–1525
Calculating energy-saving potentials of heat-island reduction strategies *H Akbari and S Konopacki* 33:6, 721–756
Causes for asymmetric relation between the price of crude oil and refined petroleum products *R K Kaufmann and C Laskowski* 33:12, 1587–1596
Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722
Economic and policy implications of public support for ethanol production in California's San Joaquin Valley *E Burnes, J W Hagen and D Wichelns* 33:9, 1155–1167
Energy and energy utilization in agricultural sector of Saudi Arabia *I Al-Zaharnah, I Dincer and M M Hussain* 33:11, 1461–1467
Energy partnership: Israel and the Persian Gulf *G Bahgat* 33:5, 671–677
Environmental and economic assessment of landfill gas electricity generation in Korea using LEAP model *H-S Kim, J-W Park, E-S Shin and H-C Shin* 33:10, 1261–1270
Environmental implications of converting light gas vehicles: the Brazilian experience *L Dondero and J Goldemberg* 33:13, 1703–1708
An exploration of the technical feasibility of achieving CO_2 emission reductions in excess of 60% within the UK housing stock by the year 2050 *M Bell, D Johnston and R Lowe* 33:13, 1643–1659
External costs of electricity production: case study Croatia *N Debrecin, Z Tomsic and M B Vrhovcak* 33:11, 1385–1395
Feebates, rebates and gas-guzzler taxes: a study of incentives for increased fuel economy *D L Greene, J Li, P D Patterson and M Singh* 33:6, 757–775
Fuel economy and traffic fatalities: multivariate analysis of international data *R B Noland* 33:17, 2183–2190
Improving air quality in large cities by substituting natural gas for coal in China: changing idea and incentive policy implications *Y Chang, X Guo, X Mao and Y Peng* 33:3, 307–318
Liberalisation, consumption heterogeneity and the dynamics of energy prices *M Araújo, P Ferreira and I Soares* 33:17, 2244–2255
Liberalisation and the security of gas supply in the UK *P Wright* 33:17, 2272–2290
Multi-criteria analysis of alternative-fuel buses for public transportation *C-W Lin, S Opricovic and G-H Tzeng* 33:11, 1373–1383
Natural gas as an alternative to crude oil in automotive fuel chains well-to-wheel analysis and transition strategy development *A P C Faaij, M P Hekkert, F H J F Hendriks and M L Neelis* 33:5, 579–594
Natural gas in Brazil's energy matrix: demand for 1995–2010 and usage factors *P S R*

Alonso, E Fernandes and M V de A Fonseca 33:3, 365–386
Paradise recovered: energy production and waste management in island environments *B Hale and M L Miranda* 33:13, 1691–1702
The political economy of trans-Pakistan gas pipeline project: assessing the political and economic risks for India *S Pandian* 33:5, 659–670
Potential long-term impacts of changes in US vehicle fuel efficiency standards *R J Bezdek and R M Wendling* 33:3, 407–719
Probabilistic analysis of electrical energy costs comparing: production costs for gas, coal and nuclear power plants *D Feretic and Z Tomsic* 33:1, 5–13
Reducing subsidies on household fuels in India: how will it affect the poor? *S Gangopadhyah, B Ramaswami and W Wadhwa* 33:18, 2326–2336
Regulation and efficiency: an empirical analysis of the United Kingdom continental shelf petroleum industry *H A Kashani* 33:7, 915–925
Renewable energy as a natural gas price hedge: the case of wind *D Berry* 33:6, 799–807
Simulating the impacts of a strategic fuels reserve in California *A Ford* 33:4, 483–498
South-East Europe Regional Energy Market: challenges and opportunities for Romania *D Kennedy* 33:17, 2202–2215
State intervention causing inefficiency: an empirical analysis of the Norwegian Continental Shelf *H A Kashani* 33:15, 1998–2009
Technological change and petroleum exploration in the Gulf of Mexico *T A Grigalunas, D Jin, S Managi and J J Opaluch* 33:5, 619–632
US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108
Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298
Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Photovoltaics

Accelerating residential PV expansion: demand analysis for competitive electricity markets *R Duke, A Payne and R Williams* 33:15, 1912–1929
Are new institutional economics enough? Promoting photovoltaics in India's agricultural sector *V Radulovic* 33:14, 1883–1899
Design for renewable energy systems with application to rural areas in Japan *K Kubo, A Lamont and T Nakata* 33:2, 209–219
Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798
Environmental impacts from the solar energy technologies *N Frantzeskaki, V Gekas and T Tsoutsos* 33:3, 289–296
Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410
Meeting electrification's social objectives in South Africa, and implications for developing countries *C T Gaunt* 33:10, 1309–1317
The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312
Renewable energy policy goals, programs, and technologies *M Bazilian and P Komor* 33:14, 1873–1881
UK innovation systems for new and renewable energy technologies: drivers, barriers and systems failures *D Anderson, A Arnall, A Chase, T J Foxon, R Gross and J Howes* 33:16, 2123–2137
Village electrification technologies—an evaluation of photovoltaic cells and compact fluorescent lamps and their applicability in rural villages based on a Tanzanian case study *M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1287–1298

Power sector

Benchmarking and incentive regulation of quality of service: an application to the UK electricity distribution networks *D Giannakis, T Jamasb and M Pollitt* 33:17, 2256–2271
Business opportunities and dynamic competition through distributed generation in primary electricity distribution networks *R Raineri, S Rios and R Vásquez* 33:17, 2191–2201
Carbon emission coefficient of power consumption in India: baseline determination from the demand side *B Nag and J K Parikh* 33:6, 777–786
Carbon intensity of electricity generation and CDM baseline: case studies of three Chinese provinces *T C Heller, M M May and C Zhang* 33:4, 451–465
Cost functions and the electric utility industry. A contribution to the debate on deregulation *F J Ramos-Real* 33:1, 69–87
Decision support tool to evaluate alternative policies regulating wind integration into autonomous energy systems *G C Contaxis, J Kabouris and N Zouros* 33:12, 1541–1555
Electricity generation: regulatory mechanisms to incentive renewable alternative energy sources in Brazil *C K N Cavaliero and E P Da Silva* 33:13, 1745–1752
Electricity market modeling trends *A Baillo, A Ramos, M Rivier and M Ventosa* 33:7, 897–913
Electricity restructuring in Turkey *Ö Özkývrak* 33:10, 1339–1350
Electricity sector restructuring in India: an environmentally beneficial policy? *R Perkins* 33:4, 439–449
Electricity tariffs in Hong Kong: what went wrong and what can we do about it? *S Luk* 33:8, 1085–1093
Electrification co-operatives bring new light to rural Tanzania *W Chambala, M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1299–1307
Empirical observations of bidding patterns in Australia's National Electricity Market *D Batten, G Grozev and X Hu* 33:16, 2075–2086
Environmental impacts and benefits of regional power grid interconnections for China *X Guo, S Wang, Y Zheng and F Zhu* 33:14, 1797–1805
External costs of electricity production: case study Croatia *N Debrecin, Z Tomsic and M B Vrhovcak* 33:11, 1385–1395
Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410
Impact assessment of the Electricity Act 2003 on the Indian power sector *S G Deshmukh, S C Kaushik, M Kilshrestha and T Thakur* 33:9, 1187–1198
Industrial DSM in a deregulated European electricity market—a case study of 11 plants in Sweden *B G Karlsson and L Trygg* 33:11, 1445–1459
Integrated resource planning (IRP) and power sector reform in developing countries *A D'Sa* 33:10, 1271–1285
IT substitution for energy leads to a resilient structure for a survival strategy of Japan's electric power industry *C A Carvajal, M Kishioka and C Watanabe* 33:8, 1069–1084
Meeting electrification's social objectives in South Africa, and implications for developing countries *C T Gaunt* 33:10, 1309–1317
Nigeria's electric power sector reform: what should form the key objectives? *O J Ebohon and J Ikeme* 33:9, 1213–1221
Optimal electricity market for wind power *H Holttinen* 33:16, 2052–2063
Optimising trans-national power generation and transmission investments: a Southern African example *B Gonah, B Graeber and R Spalding-Fecher* 33:18, 2337–2349
Performance of Indian power sector during a decade under restructuring: a critique *R Balasubramanian, P S C Nair and D P Sharma* 33:4, 563–576
Power sector reforms in Brazil and its impacts on energy efficiency and research and development *G D M Jannuzzi* 33:13, 1753–1762
The residential demand for electricity in Australia: an application of the bounds testing approach to cointegration *P K Narayan and R Smyth* 33:4, 467–474
The road to green power in Mexico—reflections on the prospects for the large-scale and sustainable implementation of renewable energy *J M Huacuz* 33:16, 2087–2099
South-East Europe Regional Energy Market: challenges and opportunities for Romania *D Kennedy* 33:17, 2202–2215
Supply- and demand-side effects of power sector planning with demand-side management options and SO_2 emissions constraints *C O P Marpaung and R M Shrestha* 33:6, 815–825

Refrigeration and air conditioning

Climate-related electricity demand-side management in oil-exporting countries—the case of the United Arab Emirates *M A Al-Iriani* 33:18, 2350–2360
ENERGY STAR product specification development framework: using data and analysis to make program decisions *R Clark, A Fanara, C Hershberg, M McWhinney, J Roberson and R Schmeltz* 33:12, 1613–1625
Labeling design effort for household refrigerator-freezers in Malaysia *T M I Mahlia, H H Masjuki and R Saidur* 33:5, 611–618
Promoting energy-efficient products: GEF experience and lessons for market transformation in developing countries *S Birner and E Martinot* 33:14, 1765–1779

Regulation
Cost functions and the electric utility industry. A contribution to the debate on deregulation *F J Ramos-Real* 33:1, 69–87
Regulation and efficiency: an empirical analysis of the United Kingdom continental shelf petroleum industry *H A Kashani* 33:7, 915–925

Renewable energy
Additional renewable energy growth through small-scale community orientated energy policies *G W Ault, A Cruden, S J Galloway, J J Hain and J R McDonald* 33:9, 1199–1212
Are new institutional economics enough? Promoting photovoltaics in India's agricultural sector *V Radulovic* 33:14, 1883–1899
Brazilian energy policies side-effects on CO_2 emissions reduction *W Chandler, R Schaeffer, M E Schuller and A S Szklo* 33:3, 349–364
Design for renewable energy systems with application to rural areas in Japan *K Kubo, A Lamont and T Nakata* 33:2, 209–219
Determination of the optimal installation capacity of small hydro-power plants through the use of technical, economic and reliability indices *F Forouzbakhsh, S M H Hosseini and M Rahimpoor* 33:15, 1948–1956
The early adoption of green power by Dutch households An empirical exploration of factors influencing the early adoption of green electricity for domestic purposes *K Arkesteijn and L Oerlemans* 33:2, 183–196
Electricity generation: regulatory mechanisms to incentive renewable alternative energy sources in Brazil *C K N Cavaliero and E P Da Silva* 33:13, 1745–1752
Energy and environment in the ASEAN: challenges and opportunities *S K Karki, M d Mann and H Salehfar* 33:4, 499–509
An estimation of the Swiss hydropower rent *S Banfi, M Filippini and A Mueller* 33:7, 927–937
A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Rio* 33:10, 1239–1250
Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743
Global experience curves for wind farms *A Faaij, M Junginger and W C Turkenburg* 33:2, 133–150
Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410
The impact of global change on the hydropower potential of Europe: a model-based analysis *G Czisch, B Lehner and S Vassolo* 33:7, 839–855
The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022
Managing a reservoir-based hydro-energy plant: building understanding in the buy and sell decisions in a changing environment *P Davidsen, M Rudd and A van Ackere* 33:7, 939–947
A multicriteria approach to evaluate wind energy plants on an Italian island *F Cavallaro and L Ciraolo* 33:2, 235–244
Near-term technology policies for long-term climate targets—economy wide versus technology specific approaches *C Azar and B A Sandén* 33:12, 1557–1576
The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312
Public and private attitudes towards "green" electricity: the case of Swedish wind power *K Ek* 33:13, 1677–1689
Renewable energy as a natural gas price hedge: the case of wind *D Berry* 33:6, 799–807
Renewable energy policy goals, programs, and technologies *M Bazilian and P Komor* 33:14, 1873–1881
Renewable energy policy in South Africa: policy options for renewable electricity *H Winkler* 33:1, 27–38
Renewables portfolio standard and regional energy structure optimisation in China *J Fan, D M Ren and W Sun* 33:3, 279–287
The road to green power in Mexico—reflections on the prospects for the large-scale and sustainable implementation of renewable energy *J M Huacuz* 33:16, 2087–2099
Solar supported steam production for power generation in Egypt *M A H El-Sayed* 33:10, 1251–1259
Techno-economic evaluation of small hydro power plants in Greece: a complete sensitivity analysis *J K Kaldellis, G Korbakis and D S Vlachou* 33:15, 1969–1985
UK biomass energy since 1990: the mismatch between project types and policy objectives *D van der Horst* 33:5, 705–716
UK innovation systems for new and renewable energy technologies: drivers, barriers and systems failures *D Anderson, A Arnall, A Chase, T J Foxon, R Gross and J Howes* 33:16, 2123–2137
US electricity industry response to carbon constraint: a life-cycle assessment of supply side alternatives *P L Denholm, G L Kulcinski, P J Meier and P P H Wilson* 33:9, 1099–1108
Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142

Renewables
Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798
Nigeria's electric power sector reform: what should form the key objectives? *O J Ebohon and J Ikeme* 33:9, 1213–1221

Rural energy
Cooking fuel use patterns in India: 1983–2000 *K S K Kumar and B Viswanathan* 33:8, 1021–1036
Design for renewable energy systems with application to rural areas in Japan *K Kubo, A Lamont and T Nakata* 33:2, 209–219
Electrification co-operatives bring new light to rural Tanzania *W Chambala, M Gullberg, E Ilskog, M Katyega and B Kjellström* 33:10, 1299–1307
Meeting electrification's social objectives in South Africa, and implications for developing countries *C T Gaunt* 33:10, 1309–1317
A model of household energy services in a low-income rural African village *T Alfstad, G Goldstein, M I Howells, U Remme and D G Victor* 33:14, 1833–1851

Solar energy
Are new institutional economics enough? Promoting photovoltaics in India's agricultural sector *V Radulovic* 33:14, 1883–1899
Energy efficiency improvement procedures and audit results of electrical, thermal and solar applications in Palestine *I H Ibrik and M M Mahmoud* 33:5, 651–658
Environmental impacts from the solar energy technologies *N Frantzeskaki, V Gekas and T Tsoutsos* 33:3, 289–296
Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410
The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312
Solar supported steam production for power generation in Egypt *M A H El-Sayed* 33:10, 1251–1259
UK innovation systems for new and renewable energy technologies: drivers, barriers and systems failures *D Anderson, A Arnall, A Chase, T J Foxon, R Gross and J Howes* 33:16, 2123–2137

Sustainable energy
Diversification and localization of energy systems for sustainable development and energy security *X Li* 33:17, 2237–2243
Energy and environment in the ASEAN: challenges and opportunities *S K Karki, M d Mann and H Salehfar* 33:4, 499–509
Energy and the World Summit on Sustainable Development: what next? *R Spalding-Fecher, S Mwakasonda and H Winkler* 33:1, 99–112
Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited *C Y Keong* 33:5, 679–689
A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Rio* 33:10, 1239–1250
Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743

Technology
Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722
Endogenous technological change and emissions: the case of the German steel industry *C Lutz, B Meyer, C Nathani and J Schleich* 33:9, 1143–1154
Energy and energy utilization in agricultural sector of Saudi Arabia *I Al-Zaharnah, I Dincer and M M Hussain* 33:11, 1461–1467
Energy efficiency—a forgotten goal in the Swedish building sector? *J Holmberg and J Nässén* 33:8, 1037–1051
ENERGY STAR product specification development framework: using data and analysis to make program decisions *R Clark, A Fanara, C Hershberg, M McWhinney, J Roberson and R Schmeltz* 33:12, 1613–1625
Environmental implications of converting light gas vehicles: the Brazilian experience *L Dondero and J Goldemberg* 33:13, 1703–1708

IT substitution for energy leads to a resilient structure for a survival strategy of Japan's electric power industry *C A Carvajal, M Kishioka and C Watanabe* 33:8, 1069–1084
Multi-criteria analysis of alternative-fuel buses for public transportation *C-W Lin, S Opricovic and G-H Tzeng* 33:11, 1373–1383

The role of utilities
Consumer lifestyle approach to US energy use and the related CO_2 emissions *S Bin and H Dowlatabadi* 33:2, 197–208
Impact of electricity prices and volumetric water allocation on energy and groundwater demand management: analysis from Western India *M D Kumar* 33:1, 39–51
Power sector reforms in Brazil and its impacts on energy efficiency and research and development *G D M Jannuzzi* 33:13, 1753–1762

Tradable permits
A European-wide harmonised tradable green certificate scheme for renewable electricity: is it really so beneficial? *P del Rio* 33:10, 1239–1250
Enforcing the Kyoto Protocol: sanctions and strategic behavior *C Hagem, S Kallbekken, O Mæstad and H Westskog* 33:16, 2112–2122
Impacts of a common green certificate market on electricity and CO_2-emission markets in the Nordic countries *E O Ahlgren and T Unger* 33:16, 2152–2163
The implications of the Kyoto project mechanisms for the deployment of renewable electricity in Europe *P del Rio, M Gual and F Hernández* 33:15, 2010–2022
Project–based mechanisms for emissions reductions: balancing trade-offs with baselines *C Fischer* 33:14, 1807–1823
Transaction costs, institutional rigidities and the size of the clean development mechanism *F Jotzo and A Michaelowa* 33:4, 511–523

Transportation
Assessing policies towards sustainable transport in Europe: an integrated model *T Zachariadis* 33:12, 1509–1525
Causes for asymmetric relation between the price of crude oil and refined petroleum products *R K Kaufmann and C Łaskowski* 33:12, 1587–1596
Diesel *vs.* compressed natural gas for school buses: a cost-effectiveness evaluation of alternative fuels *J T Cohen* 33:13, 1709–1722
Environmental implications of converting light gas vehicles: the Brazilian experience *L Dondero and J Goldemberg* 33:13, 1703–1708
Exploring the possibilities for setting up sustainable energy systems for the long term: two visions for the Dutch energy system in 2050 *A P C Faaij, A Seebregts, J Spakman and D J Treffers* 33:13, 1723–1743
Feebates, rebates and gas-guzzler taxes: a study of incentives for increased fuel economy *D L Greene, J Li, P D Patterson and M Singh* 33:6, 757–775
Fuel economy and traffic fatalities: multivariate analysis of international data *R B Noland* 33:17, 2183–2190
Genetic algorithm approach to estimate transport energy demand in Turkey *H Ceylan and S Haldenbilen* 33:1, 89–98
Multi-criteria analysis of alternative-fuel buses for public transportation *C-W Lin, S Opricovic and G-H Tzeng* 33:11, 1373–1383
Natural gas as an alternative to crude oil in automotive fuel chains well-to-wheel analysis and transition strategy development *A P C Faaij, M P Hekkert, F H J F Hendriks and M L Neelis* 33:5, 579–594
Oil consumption and CO_2 emissions in China's road transport: current status, future trends, and policy implications *F An, D He, K He, H Huo, M P Walsh, M Wang and Q Zhang* 33:12, 1499–1507
Potential long-term impacts of changes in US vehicle fuel efficiency standards *R J Bezdek and R M Wendling* 33:3, 407–719
Using energy scenarios to explore alternative energy pathways in California *J G Koomey and R Ghanadan* 33:9, 1117–1142

Wind energy
Distributed generation: definition, benefits and issues *R Belmans, W D'haeseleer, J Driesen, D Haeseldonckx and G Pepermans* 33:6, 787–798
Renewable energy as a natural gas price hedge: the case of wind *D Berry* 33:6, 799–807

Wind power
Decision support tool to evaluate alternative policies regulating wind integration into autonomous energy systems *G C Contaxis, J Kabouris and N Zouros* 33:12, 1541–1555
Design for renewable energy systems with application to rural areas in Japan *K Kubo, A Lamont and T Nakata* 33:2, 209–219
Explaining wind power planning outcomes: Some findings from a study in England and Wales *D Toke* 33:12, 1527–1539
Global experience curves for wind farms *A Faaij, M Junginger and W C Turkenburg* 33:2, 133–150
Green electricity policies in the United States: case study *F C Menz* 33:18, 2398–2410
A multicriteria approach to evaluate wind energy plants on an Italian island *F Cavallaro and L Ciraolo* 33:2, 235–244
Optimal electricity market for wind power *H Holttinen* 33:16, 2052–2063
Policies and market factors driving wind power development in the United States *L Bird, M Bolinger, M Brown, T Gagliano, B Parsons and R Wiser* 33:11, 1397–1407
The potential contribution of renewable energy to electricity supply in Saudi Arabia *O Alnatheer* 33:18, 2298–2312
Public and private attitudes towards "green" electricity: the case of Swedish wind power *K Ek* 33:13, 1677–1689
Renewable energy policy goals, programs, and technologies *M Bazilian and P Komor* 33:14, 1873–1881
Social attitude towards wind energy applications in Greece *J K Kaldellis* 33:5, 595–602
UK innovation systems for new and renewable energy technologies: drivers, barriers and systems failures *D Anderson, A Arnall, A Chase, T J Foxon, R Gross and J Howes* 33:16, 2123–2137
Wind power in Finland up to the year 2025—'soft' scenarios based on expert views *P Tapio and V Varho* 33:15, 1930–1947
Wind power planning: assessing long-term costs and benefits *S Kennedy* 33:13, 1661–1675

Corrigenda

Corrigendum to "Bioenergy policy and market development in Finland and Sweden?" [Energy Policy 32 (2004) 1707–1721] *K Ericsson, S Huttunen, L J Nilsson and P Svenningson* 33:1, 129
Corrigendum to "Consumer lifestyles approach to US energy use and the related CO_2 emissions" [Energy Policy 33 (2005) 197–208] *S Bin and H Dowlatabadi* 33:10, 1363
Corrigendum to "Energy demand, economic growth, and energy efficiency—the Bakun dam-induced sustainable energy policy revisited" [Energy Policy 32 (2004) 679–689] *C Y Keong* 33:11, 1495
Corrigendum to "Feebates, rebates and gas-guzzler taxes: a study of incentives for increased fuel economy" [Energy Policy 33 (2005) 757–775] *D L Greene, J Li, Patterson, P D and Singh, M* 33:14, 1901–1902

Viewpoints

A healthy reduction in oil consumption and carbon emissions *M Higgins and P A T Higgins* 33:1, 1–4
Alleviating energy poverty for the world's poor *A D Sagar* 33:11, 1367–1372
"Carbon-Money Exchange" to contain global warming and deforestation *K Nagase* 33:10, 1233–1238
De-regulated electric power markets and operating nuclear power plants: the case of British energy *J G Hewlett* 33:18, 2293–2297
Distribution of energy consumption and the 2000 W/capita target *D. Spreng* 33:15, 1905–1911
Questioning hydrogen *R Hammerschlag and P Mazza* 33:16, 2039–2043

Book reviews

Energy, the state, and the market: British energy policy since 1979 *D Helm* (R G Skinner) 33:11, 1493–1494
Petro-dragon's rise: What it means for China and the World *X Xu (Ed)* (D Zha) 33:1, 127
Renewable energy: in sustainability and environmental impact of renewable energy sources *B J Bulkin, D A Elliott, D G Infield, P N Rowley, A Loening, F Mullins, A C Stirling and B Wilson* (B Peuportier) 33:17, 2291–2292
Why carbon fuels will dominate the 21st century's global energy economy *P Odell* (D Ellerman) 33:18, 2411–2412
